When Values Conflict:

Values, Rationality, and Power: Developing Organizational Wisdom Brad C. Anderson, 2019-10-21 This book presents an analysis of organizational wisdom via an embedded single case study of a group's attempt to develop and spread a medical innovation within a Canadian healthcare authority. By offering a unique insight into how values, rationality, and power interact in a real social setting, the book explores how they create positive change.

The Psychology of Values Clive Seligman, James M. Olson, Mark P. Zanna, 2013-05-13 The eighth Ontario Symposium brought together an international group of scholars who work in the area of the psychology of values. Among the categories these experts address are the conceptualizations of values, value systems, and value-attitude-behavior relations; methodological issues; the role of values in specific domains such as prejudice, commitment, and deservingness; and the transmission of values through family, media, and culture. Each chapter in the volume illustrates both the diversity and vitality of research on the psychology of values.

Social Conflict within and between Groups Carsten K. W. De Dreu, 2014-05-09 Intergroup competition and conflict create pervasive problems in human society, giving rise to such phenomena as prejudice, terrorism, ethnic cleansing, and interstate war. Citizens, policy makers, social workers, schoolteachers, and politicians wrestle with these problems and with difficult questions these issues pose: What causes conflict to escalate? How should we manage conflict within communities and also in society at large? Is conflict always bad, or does it have other, more beneficial consequences? Social Conflict within and between Groups provides an overview of contemporary research from the social sciences on these questions. It brings together the research output of a number of leading researchers in psychology, management, and economics, sociology, and political science and draws on the outcomes of ten prominent research programs conducted over the past five years. The chapters cover a range of fascinating topics, including prejudice and discrimination in multi-ethnic societies and conflict and negotiation in the field of industrial relations. The authors also consider the possibilities for intervention at the interpersonal, intergroup, and societal level. This is the first volume to provide an interdisciplinary overview of the various scientific approaches to studying the origins and consequences of social conflict. It will be of great interest to researchers, graduates, and upper-level undergraduate students from across the social and behavioural sciences.

The Implications of Value Conflict Marina Kouzakova, Naomi Ellemers, Sophia Fieke Harinck, Daan Scheepers, 2011 We present two studies demonstrating the implications of having different values vs. instrumental concerns in a situation where people take conflicting positions. Study 1 (N = 266) examined how people respond to a range of conflict issues that were framed either as referring to conflicting values or as referring to conflicting interests. Study 2 (N = 77) used a more immersive methodology in which participants were led to consider either their values or interests in taking up a particular position, after which they were presented with a confederate who took up the opposite position. Results of both studies converge to demonstrate that framing a particular conflict issue in terms of values causes people to experience more self-involvement and to perceive less common ground. This is seen as a potential explanation of why value

conflicts tend to more easily escalate than conflicts of interests but also offers scope for interventions that try to de-escalate and resolve the conflict by emphasizing instrumental rather than value differences
