Intelligent Industrial Internet Systems Wanchun Dou,Xiaolong Xu,Shui Yu,2023-11-20 In the process of transforming modern manufacturing into intelligent manufacturing more and more manufacturing processes are being deployed digitally on the Internet As a novel digital industrial infrastructure and new application ecology Industrial Internet could integrate the novel information and communication technology into various industrial manufacturing processes through the safe and reliable intelligent interconnection of factors concerning people machines and things It aims at significantly improving the digitalization networking and intelligence of manufacturing processes through the comprehensive interconnection of all manufacturing factors To deploy and run traditional manufacturing processes on Industrial Internet efficiently corresponding digital technical means are called for These technical means play an important role in many potential applications of intelligent manufacturing e g integrating product lifecycle data strengthening industrial chain cooperation providing decision making service information oriented on the production organization process and providing data support for product optimization and upgrading This book focuses on the theory techniques and means for integrating intelligent Industrial Internet applications deployed via mobile edge computing Concretely it mainly studies the intelligent theory techniques and means from a problem driven and demand driven perspective which supports collaborative design agile manufacturing remote operation and maintenance on Industrial Internet These technologies primarily include Industrial Internet centric intelligent resource scheduling methods various types of industrial data privacy protection intelligent version management technologies supporting digital twin applications various data mining algorithms for intelligent execution of business processes etc Given its scope the book offers a valuable theoretical and technical resource for project managers technical developers researchers educators and students at colleges and universities *Graph Drawing and Network Visualization* Patrizio Angelini,Reinhard von Hanxleden,2023-01-18 This book constitutes the proceedings of the 30th International Symposium on Graph Drawing and Network Visualization GD 2022 held in Tokyo Japan during September 13 16 2022 The 25 full papers 7 short papers presented together with 2 invited talks one report on graph drawing contest and one obituary in these proceedings were carefully reviewed and selected from 70 submissions The abstracts of 5 posters presented at the conference can be found in the back matter of the volume The contributions were organized in topical sections as follows properties of drawings of complete graphs stress based visualizations of graphs planar and orthogonal drawings drawings and properties of directed graphs beyond planarity dynamic graph visualization linear layouts and contact and visibility graph representations The Real Internet Architecture Pamela Zave,Jennifer Rexford,2024-06-25 A new way to understand the architecture of today s Internet based on an innovative general model of network architecture that is rigorous realistic and modular This book meets the long standing need for an explanation of how the Internet s architecture has evolved since its creation to support an ever broader range of the world s communication needs The authors introduce a new model of

network architecture that exploits a powerful form of modularity to provide lucid insightful descriptions of complex structures functions and behaviors in today s Internet Countering the idea that the Internet s architecture is ossified or rigid this model which is presented through hundreds of examples rather than mathematical notation encompasses the Internet s original or classic architecture its current architecture and its possible future architectures For practitioners the book offers a precise and realistic approach to comparing design alternatives and guiding the ongoing evolution of their applications technologies and security practices For educators and students the book presents patterns that recur in many variations and in many places in the Internet ecosystem Each pattern tells a compelling story with a common problem to be solved and a range of solutions for solving it For researchers the book suggests many directions for future research that exploit modularity to simplify optimize and verify network implementations without loss of functionality or flexibility **SOFSEM 2025: Theory and Practice of Computer Science** Rastislav Královič,Věra Kůrková,2025-02-06 This book constitutes the proceedings of the 50th International Conference on Current Trends in Theory and Practice of Computer Science SOFSEM 2025 held in Bratislava Slovak Republic during January 20 23 2025 The 48 full papers presented in this book were carefully reviewed and selected from 109 submissions They include original research from all areas of foundations of computer science and artificial intelligence focusing on AI based algorithms and techniques nature inspired computing machine learning theory multi agent algorithms and games neural network theory parallel and distributed computing quantum computing computability decidability classical and non classical models of computation computational complexity computational learning cryptographic techniques and security data compression data and pattern mining methods discrete combinatorial optimization automata languages machine models rewriting systems efficient data structures graph structure and algorithms logics of computation robotics and other relevant theory topics in computing and AI **Advances in Visual Computing** George Bebis,Richard Boyle,Bahram Parvin,Darko Koracin,Daniela Ushizima,Sek Chai,Shinjiro Sueda,Xin Lin,Aidong Lu,Daniel Thalmann,Chaoli Wang,Panpan Xu,2019-10-25 This book constitutes the refereed proceedings of the 14th International Symposium on Visual Computing ISVC 2019 held in Lake Tahoe NV USA in October 2019 The 100 papers presented in this double volume were carefully reviewed and selected from 163 submissions The papers are organized into the following topical sections Deep Learning I Computer Graphics I Segmentation Recognition Video Analysis and Event Recognition Visualization ST Computational Vision AI and Mathematical methods for Biomedical and Biological Image Analysis Biometrics Virtual Reality I Applications I ST Vision for Remote Sensing and Infrastructure Inspection Computer Graphics II Applications II Deep Learning II Virtual Reality II Object Recognition Detection Categorization and Poster **Algorithmic Aspects of Wireless Sensor Networks** Shlomi Dolev,2009-12-24 This book constitutes the reviewed proceedings of the 5th International Workshop on Algorithmic Aspects of Wireless Sensor Networks ALGOSENSORS 2009 held in Rhodes Greece July 10 11 2009 The 21 full papers and two brief announcements were carefully selected from 41
