Unbroken Wing:

Robot Intelligence Technology and Applications 2 Jong-Hwan Kim, Eric T. Matson, Hyun Myung, Peter Xu, Fakhri Karray, 2014-03-21 We are facing a new technological challenge on how to store and retrieve knowledge and manipulate intelligence for autonomous services by intelligent systems which should be capable of carrying out real world tasks autonomously To address this issue robot researchers have been developing intelligence technology InT for robots that think which is in the focus of this book The book covers all aspects of intelligence from perception at sensor level and reasoning at cognitive level to behavior planning at execution level for each low level segment of the machine It also presents the technologies for cognitive reasoning social interaction with humans behavior generation ability to cooperate with other robots ambience awareness and an artificial genome that can be passed on to other robots These technologies are to materialize cognitive intelligence social intelligence behavioral intelligence collective intelligence ambient intelligence and genetic intelligence The book aims at serving researchers and practitioners with a timely dissemination of the recent progress on robot intelligence technology and its applications based on a collection of papers presented at the at the 2nd International Conference on Robot Intelligence Technology and Applications RiTA held in Denver USA December 18 20 2013

The World of Civil Aerospace Ian Jennions, 2019-05-28 Collaboratively written by eleven experts with extensive experience in the field of commercial aviation The World of Civil Aerospace is a unique book that defines its own category Covering the beginnings of commercial aviation aircraft design and certification manufacturing and testing airline operation maintenance and safety among other topics The World of Civil Aerospace shows the reader the fundamental yet almost invisible aspects of how the planes and airports we use every day actually function The title edited by Prof Ian Jennions from Cranfield University in the UK came about from the desire to share the inner workings of what it takes to create test approve certify and launch a new aircraft Not mention how to maintain it and make the user experience of flying it positive With the commercial aviation industry expected to continue to grow for decades to come the challenges of keeping aircraft in the air safely reliably and economically are enormous Thousands of engineers support personnel maintainers and crews go to work every day with one goal in mind to make sure air travel happens as it should And this is no trivial task The World of Civil Aerospace brings to light the incredible global network of coordinated tasks and skills needed to make it happen *Sukhoi Interceptors* Yefim Gordon, Dmitriy Komissarov, 2020-01-28 The first twenty years of Sukhoi supersonic interceptor development including the Su 15 a symbol of the Cold War and true guardian of the Soviet skies Closed in 1949 the Sukhoi Design Bureau was reborn in 1953 to meet an urgent demand for a fast interceptor that would counter the threat posed by NATO bombers It wasted no time developing a succession of missile armed Mach 2 interceptors characterized by delta wings the single engined Su 9 entered service in 1960 followed by the up armed Su 11 in 1964 and the twin engined Su 15 in 1967 Though built in modest numbers the three types became an important asset for the Soviet air defense force particularly the

more capable Su 15 which unfortunately became notorious for shooting down two intruding South Korean airliners within five years The Su 15 outlasted the Soviet Union the last being retired in 1996 There were also several Sukhoi interceptors that remained in prototype or project form All known versions are described as are operational details The book features many rare and previously unpublished photos

Junak Silverhand Ronald D Ferguson, Unbridled power corrupts but what halter provides the bridle Magic has a price and the price for difficult magic is rapid aging Because cold iron short circuits controlled magic wizards in the Age of Magic struggle to find a new source of power to compete against the dawning Age of Iron Without a new source of power for the wizards cold steel dooms the Age of Magic and the Age of Iron will ascend When Junak the Hunter attempts to save his wife from marauding slavers an explosion of wild magic burns away his right hand With the aid of a wizard recently released from an imprisoning stasis Junak s hand regenerates but not to its original condition Instead the hand acquires a quicksilver sheen and the magical power from Junak s hand flows into any steel weapon that he wields Magic was never able to bend iron to its will before Will Junak s new ability allow him to reunite his family or simply make him a wildcard tool that wizards can wield to topple a kingdom Junak Silverhand is Book 1 in the Age of Magic Age of Iron series
