# Expressing Patterns Algebraically

Express the number of matchsticks needed for each pattern number algebraically and draw the next pattern in the sequence. The first one is done for you.

### Example

1)

Pattern Number, P	1	2	3	4
Number of matchsticks, M	4	7	10	13

$M = 3$        $P = +1$

2)

Pattern Number, P	1	2	3	4
Number of matchsticks, M				

$M = \underline{\quad}$        $P = \underline{\quad}$

3)

Pattern Number, P	1	2	3	4
Number of matchsticks, M				

$M = \underline{\quad}$        $P = \underline{\quad}$

Mulligan, 2013-05-09 This book emanated primarily from concerns that the mathematical capabilities of young children continue to receive inadequate attention in both the research and instructional arenas Research over many years has revealed that young children have sophisticated mathematical minds and a natural eagerness to engage in a range of mathematical activities As the chapters in this book attest current research is showing that young children are developing complex mathematical knowledge and abstract reasoning a good deal earlier than previously thought A range of studies in prior to school and early school settings indicate that young learners do possess cognitive capacities which with appropriately designed and implemented learning experiences can enable forms of reasoning not typically seen in the early years Although there is a large and coherent body of research on individual content domains such as counting and arithmetic there have been remarkably few studies that have attempted to describe characteristics of structural development

in young students mathematics Collectively the chapters highlight the importance of providing more exciting relevant and challenging 21st century mathematics learning for our young students The chapters provide a broad scope in their topics and approaches to advancing young children s mathematical learning They incorporate studies that highlight the importance of pattern and structure across the curriculum studies that target particular content such as statistics early algebra and beginning number and studies that consider how technology and other tools can facilitate early mathematical development Reconceptualising the professional learning of teachers in promoting young children s mathematics including a consideration of the role of play is also addressed
