Ghana and Uganda Through the prism of the concepts of place and scale the book demonstrates the myriad of ways by which place or context directly and indirectly influence migrant s health knowledge literacy and outcomes in poor urban slums Readers will learn about the multi faceted linkages between social capital acculturation and health in places of deprivation via quantitative methods e g surveys and qualitative methods such as focus group discussions in depth interviews concept mapping and body health mapping Chapters 1 2 provide an overview of internal migration into urban slums of Ghana and Uganda and discuss the intersections between migration social capital and health in a global context Chapters 3 7 address disease patterns environmental risks to health health literacy of migrants social capital and acculturation and social capital and health The book will be of interest to professors and students as well as policy makers in low to middle income countries for planning targeted interventions

**Social Capital and Peace-Building** Michaelene Cox,2008-11-11 This new edited collection illustrates the paradoxical power of social capital in creating and resolving conflict This is the first book to bring the two faces of social capital together in a single volume and includes previously unpublished case studies statistical analyses and theoretical essays The book is divided into three sections The first investigates the role of social capital in inciting and or furthering violence the second examines the contributions of social capital to peace building the third explores the complexities and ambiguities of roles social capital may play in peace and conflict Policy implications and recommendations are included in many of the discussions in the chapters The volume tackles some key issues such as to what extent is social capital related to peace and conflict What forms does social capital take in these associations and how can the relationships be explained What impact does this have on the state and or state relations and what policy prescriptions might be made in light of the link drawn between social capital and peace conflict

Reconstruction of the Public Sphere in the Socially Mediated Age Kaoru Endo,Satoshi Kurihara,Takashi Kamihigashi,Fujio Toriumi,2017-10-31 The aim of this book is to establish a basis for resolving the various issues facing modern society by exploring the field of Computational Social Science which fuses the social and natural sciences Today society is threatened by problems concerning the environment population growth hunger and epidemics all of which could lead to the extinction of humankind However attempting to resolve these issues is extremely difficult because of the complex intertwined factors involved and because these issues are not just matters related to nature and the environment but also to society In this book we investigate this aporia of the social sciences with the help of big data which has gained considerable attention in recent years and techniques such as agent based simulation Our aim is to resolve the complex system problems characteristic of the present age In this regard the book focuses on specific issues such as the reconstruction of public character in our social media saturated modern lifestyle the current state of social capital and the resultant social changes

**Social Capital** Nan Lin,Karen S. Cook,Ronald S. Burt, Leading scholars in the field of social networks from diverse disciplines present the first systematic and comprehensive collection of current theories and empirical research on the informal connections that

individuals have for support help and information from other people Expanding on concepts originally formulated by Pierre Bourdieu and James Coleman this seminal work will find an essential place with educators and students in the fields of social networks rational choice theory institutions and the socioeconomics of poverty labor markets social psychology and race The volume is divided into three parts The first segment clarifies social capital as a concept and explores its theoretical and operational bases Additional segments provide brief accounts that place the development of social capital in the context of the family of capital theorists and identify some critical but controversial perspectives and statements regarding social capital in the literature The editors then make the argument for the network perspective why and how such a perspective can clarify controversies and advance our understanding of a whole range of instrumental and expressive outcomes Social Capital further provides a forum for ongoing research programs initiated by social scientists working at the crossroads of formal theory and new methods These scholars and programs share certain understandings and approaches in their analyses of social capital They argue that social networks are the foundation of social capital Social networks simultaneously capture individuals and social structure thus serving as a vital conceptual link between actions and structural constraints between micro and macro level analyses and between relational and collective dynamic processes They are further cognizant of the dual significance of the structural features of the social networks and the resources embedded in the networks as defining elements of social capital Nan Lin is professor of sociology Duke University Karen Cook is Ray Lyman Wilber Professor of Sociology Department of Sociology Stanford University Ronald S Burt is Hobart W Williams Professor of Sociology and Strategy University of Chicago Graduate School of Business Contexts of Social Capital Ray-May Hsung,Nan Lin,Ronald L. Douglas Johnson,2013 If relationships are the foundation on which social capital is built then individuals are the stars at the centre of the construct From there the linkages are made to either bond or bridge individuals in an interconnected fashion As connections form the depth and breadth of ones social capital changes this may prompt a shift in perspective that offers new and unique illuminations or experiences This collection is illustrative of that growth in social capitalism as the contributions represent a range of disciplines methodologies samples of diverse backgrounds and conclusions **Undercurrent Journal: Vol. 9, Issue 1 (Spring/Summer 2012) [Color]** Mérédyth Bowcott (Editor-in-Chief),2012-11-08 Undercurrent is the only student run national undergraduate journal publishing scholarly essays and articles that explore the subject of international development The journal is a refereed publication dedicated to providing a non partisan supportive yet critical and competitive forum exclusively for undergraduate research writing and editing *The Handbook of Social Capital* Dario Castiglione,Jan W. van Deth,Guglielmo Wolleb,2008-04-17 Social capital is a relatively new concept in the social sciences In the last twenty or so years it has come

to indicate that networks of social relationships represent a resource for both the individual and society since they provide support for the individual and facilitate collective action. Although this is not an entirely new idea, the more systematic way in which social capital captures such an intuition has created a new theoretical paradigm and helped to develop a series of innovative research programmes in politics, economics, and the study of human well-being. The concept has gained currency beyond academia, extending its influence to political and policy-making circles at local, national, and international levels. It has also affected the way in which social surveys are conceived and public policies assessed. As the idea of social capital has spread, the literature about it has increased exponentially. After twenty years of rapid expansion, it is time for a more considered and critical assessment of how the original concept has been adapted and refined and how successful its application has been. The Handbook of Social Capital intends to do precisely that. It offers a state-of-the-art view of discussions about the concept of social capital and the way in which it has been applied in empirical research. The organization of the Handbook reflects this intention by focusing on conceptual development and analysis in the first part, by identifying two main areas of research in which social capital has favoured the development of new and influential research programmes: political participation in democratic societies and economic development, and by exploring the more normative and policy-oriented consequences of social capital. All chapters comprising the volume were specifically written for the Handbook by some of the main experts in the fields. The book provides an authoritative and innovative introduction to the study of social capital.

Rethinking Social Capital Bankston III, Carl L., 2022-05-13. Innovation for Entrepreneurs presents a powerful but easy-to-apply toolkit for innovation based on Professors Meyer and Lee's decades of experience as company founders and innovators for corporations around the globe. This textbook includes guidance in developing new product and service ideas with genuine impact, building teams around these ideas, understanding customers' needs, translating these needs into compelling product and service designs, and creating initial prototypes. It also helps students learn how to scope and size target markets and position an innovation successfully relative to competitors. These methods are fundamental for any new impactful venture.

*Brokerage and Closure* Ronald S. Burt, 2005-08-11. Social Capital: the advantage created by location in social structure is a critical element in business strategy. Who has it, how it works, and how to develop it have become key questions as markets, organizations, and careers become more and more dependent on informal, discretionary relationships. The formal organization deals with accountability; everything else flows through the informal: advice, coordination, cooperation, friendship, gossip, knowledge, trust. Informal relations have always been with us; they have always mattered. What is new is the range of activities in which they now matter and the emerging clarity we have about how they create advantage for certain people at the expense of others. This is done by brokerage and closure. Ronald S. Burt builds upon his celebrated work in this area to explore the nature of brokerage and closure. Brokerage is the activity of people who live at the intersection of social worlds who have a vision, advantage of seeing and developing good ideas, an advantage which can be seen in their

compensation recognition and the responsibility they're entrusted with in comparison to their peers. Closure is the tightening of coordination in a closed network of people and people who do this do well as a complement to brokers because of the trust and alignment they create. Brokerage and Closure explores how these elements work together to define social capital, showing how in the business world reputation has come to replace authority, pursued opportunity, assignment, and reward has come to be associated with achieving competitive advantage in a social order of continuous disequilibrium.

**Creation and Returns of Social Capital** Henk Flap, Beate Völker, 2004-08-02. The idea of a social capital research program has become increasingly significant within the social sciences. This collection of essays contributes to a theoretical integration as well as standardization of measurement instruments and coordination of empirical research on the significance of social capital.

**The SAGE Encyclopedia of Corporate Reputation** Craig E. Carroll, 2016-05-31. What creates corporate reputations and how should organizations respond? Corporate reputation is a growing research field in disciplines as diverse as communication, management, marketing, industrial and organizational psychology, and sociology. As a formal area of academic study, it is relatively young with roots in the 1980s and the emergence of specialized reputation rankings for industries, products, services, and performance dimensions, and for regions. Such rankings resulted in competition between organizations and the alignment of organizational activities to qualify and improve standings in the rankings. In addition, today's changing stakeholder expectations, the growth of advocacy, demand for more disclosures, and greater transparency, and globalized, mediated environments create new challenges, pitfalls, and opportunities for organizations. Successfully engaging, dealing with, and working through reputational challenges requires an understanding of options and tools for organizational decision making and stakeholder engagement. For the first time, the vast and important field of corporate reputation is explored in the format of an encyclopedic reference. The SAGE Encyclopedia of Corporate Reputation comprehensively overviews concepts and techniques for identifying, building, measuring, monitoring, evaluating, maintaining, valuing, living up to, and/or changing corporate reputations. Key features include 300 signed entries, organized in A to Z fashion in 2 volumes, available in a choice of electronic or print formats. Entries conclude with Cross References and Further Readings to guide students to in-depth resources. Although organized A to Z, a thematic Reader's Guide in the front matter groups related entries by broad areas. A Chronology provides historical perspective on the development of corporate reputation as a discrete field of study. A Resource Guide in the back matter lists classic books, key journals, associations, websites, and selected degree programs of relevance to corporate reputation. A General Bibliography will be accompanied by visual maps noting the relationships between the various disciplines touching upon corporate reputation studies. The work concludes with a comprehensive Index, which in the electronic version combines with the Reader's Guide and Cross References to provide thorough search and browse capabilities.
