Greenblatt, 2012-12-06 The decision taken during the First International Congress on the Menopause in June 1976 to repeat the exercise 2 years later turned out to be a good one In the last few years much work has been done on the subject of the menopause It is of course a subject of many facets but of particular importance recently has been the work done as a result of the reports appearing in 1975 and 1976 alleging an increase in the incidence of endometrial carcinoma in women who had used oestrogens and of other effects some beneficial others deleterious reportedly seen when oestrogens were administered 1978 seemed the right time to re assess the situation and the Second International Congress on the Menopause provided a good platform The congress was held in Jerusalem in June 1978 It took the form of a series of 12 workshops each of which within a prescribed framework was planned and presided over by a moderator experienced in that particular field The 12 moderators were free to organize their sessions in whichever way they wished and to invite whoever they wished to present papers and to join in the discussions In addition the workshops were open to anyone who wished to attend Testosterone Dreams John Hoberman, 2005-02-21 Testosterone has inspired dreams of restored youth recharged sexual appetites faster running quicker thinking bigger muscles since it was first synthesized in 1935 This provocative book investigates the complex bizarre and sometimes outrageous history of synthetic testosterone and other male hormone therapies Exploring many little known social arenas both inside and outside the medical world in which these substances are becoming increasingly available and accepted Testosterone Dreams examines the implications and dangers of their use in professional sports in the workplace in our sex lives and beyond Testosterone Dreams tells the story of testosterone's growing and sometimes concealed influence in our culture over the past 70 years It explores such controversial topics as the invention and marketing of the male menopause the disturbing history of hormonal and other medical treatments aimed at boosting or suppressing women's sexuality and hormone doping in sporting events such as the Tour de France and the Olympics and in Major League Baseball It brings to light the hidden use of hormone doping by policemen soldiers and other workers in a variety of jobs It also discusses the burgeoning steroid use in the gay community and its relation to AIDS and takes a hard look at the pharmaceutical industry's promotional campaigns to create new markets for testosterone products Testosterone Dreams is the first book to bring together the whole story of testosterone and to consider its social and ethical implications Where does therapy end and performance enhancement begin How are changing medical technologies affecting how we think about our identities as men and women and the elusive goal of well being This book will be essential reading as we move inexorably toward the wide open libertarian pharmacology that is now making these drug regimes available to a wider and wider clientele **Exploring the Dimensions of Human Sexuality** Jerrold Greenberg, Clint Bruess, Sarah Conklin, 2010-03-10
