The Man From Yesterday:

Context-Dependence in the Analysis of Linguistic Meaning Hans Kamp, Barbara Partee, 2021-10-01 Does context and context dependence belong to the research agenda of semantics and specifically of formal semantics Not so long ago many linguists and philosophers would probably have given a negative answer to the question However recent developments in formal semantics have indicated that analyzing natural language semantics without a thorough accommodation of context dependence is next to impossible The classification of the ways in which context and context dependence enter semantic analysis though is still a matter of much controversy and some of these disputes are ventilated in the present collection This book is not only a collection of papers addressing context dependence and methods for dealing with it it also records comments to the papers and the authors replies to the comments In this way the contributions themselves are contextually dependent In view of the fact that the contributors to the volume are such key figures in contemporary formal semantics as Hans Kamp Barbara Partee Reinhard Muskens Nicholas Asher Manfred Krifka Jaroslav Peregrin and many others the book represents a quite unique inquiry into the current activities on the semantics side of the semantics pragmatics boundary

The Shadow of Yesterday's Man Tony Ives, 2015-03-28 Sci fi crime noir When a dead man sets you on a collision course with the police and a gunfight in a cemetery as a reasonably respectable PI you might feel the need to reconsider your line of work But when a dead woman comes back to life to hire you and someone blows your house up it might be time to get out of town

Meisel, 2012-12-06 other aspects of developing grammars And this is indeed what the contributions to this volume do Parameterization of functional categories may however be understood in different ways even if one shares the dual assumptions that substantive elements verbs nouns etc are present in all grammars and that X bar principles are part of the grammatical knowledge available to the child prior to language specific learning processes From these assumptions it follows that the child should from early on be able to construct projections on the basis of these elements The role of functional categories however may still be interpreted differently One possibility first suggested by Radford 1986 1990 and by Guilfoyle and Noonan 1988 is that children must discover which functional categories FC need to be implemented in the grammar of

the language they are acquiring Another possibility first explored by Hyams 1986 is that a specific category is present in developing grammars but that parameter values are set in a way deviating from the target adult grammar corresponding however to options realized in other adult systems A third option would be that these categories might be specified differently in developing as opposed to mature grammars All three are explored in the papers collected in this volume Before outlining the various hypotheses in more detail however I would like briefly to sketch the grammatical context in which the following debate is situated 2

Grammatical theory Stefan Müller, 2019 This book introduces formal grammar theories that play a role in current linguistic theorizing Phrase Structure Grammar Transformational Grammar Government Binding Generalized Phrase Structure Grammar Lexical Functional Grammar Categorical Grammar Head Driven Phrase Structure Grammar Construction Grammar Tree Adjoining Grammar The key assumptions are explained and it is shown how the respective theory treats arguments and adjuncts the active passive alternation local reorderings verb placement and fronting of constituents over long distances The analyses are explained with German as the object language The second part of the book compares these approaches with respect to their predictions regarding language acquisition and psycholinguistic plausibility The nativism hypothesis which assumes that humans possess genetically determined innate language specific knowledge is critically examined and alternative models of language acquisition are discussed The second part then addresses controversial issues of current theory building such as the question of flat or binary branching structures being more appropriate the question whether constructions should be treated on the phrasal or the lexical level and the question whether abstract non visible entities should play a role in syntactic analyses It is shown that the analyses suggested in the respective frameworks are often translatable into each other The book closes with a chapter showing how properties common to all languages or to certain classes of languages can be captured This book is a new edition of <http://langsci.press.org/catalog/book/25> and <http://langsci.press.org/catalog/book/195>
