Self of art and reason Adhering to the self critical impulse of Kant s philosophy by positing the equiprimordiality of both the empirical world and the intelligible subject and trying to overcome the chorismos between them through the classicist model of aesthetic Bildung they argued for the co extensiveness of the reality of both philosophy and literature The authors investigate how the latent antagonism between these divergent traditions of the so called Goethezeit creates the thrust behind the intellectual firework of divergent literary and philosophical discourses from around 1800 throughout the 19th and into the 20th century
