**Tirpitz in Norway** Angus Konstam, 2019-11-28 In September 1943 under the cover of darkness six British midget submarines crept into the heart of enemy territory penetrating a heavily guarded Norwegian fjord in an attempt to eliminate the threat of the powerful German battleship the Tirpitz Numerous previous attempts to attack the ship from both air and sea had failed and this mission was carefully strategized and undertaken by skilled operatives who had undergone extensive training in an isolated sea loch Though five of the six X Craft submarines were either lost or captured two crews had just enough time to lay their explosive charges which detonated after they were forced to the surface putting the Tirpitz out of action for a crucial six month period Masterminded from a top secret naval headquarters on the east coast of Scotland Operation Source has been memorialised as one of the most daring naval raids of World War II This new study tells the complete story of this epic operation in unparalleled detail supported by full colour illustrations and contemporary photography

**Chamber Divers** Rachel Lance, 2024-04-16 The previously classified story of the eccentric researchers who invented cutting edge underwater science to lead the Allies to D Day victory In August 1942 more than 7 000 Allied troops rushed the beaches of Normandy France in an all but forgotten landing Only a small fraction survived unscathed It was two summers before D Day and the Allies realized that they were in dire need of underwater intelligence if they wanted to stand a chance of launching another beach invasion and of winning the war Led by the controversial biologists J B S Haldane and Dr Helen Spurway an ingenious team of ragtag scientists worked out of

homemade labs during the London Blitz Beneath a rain of bombs they pioneered thrilling advances in underwater reconnaissance through tests done on themselves in painful and potentially fatal experiments Their discoveries led to the safe use of miniature submarines and breathing apparatuses which ultimately let the Allies take the beaches of Normandy Blast injury specialist Dr Rachel Lance unpacks the harrowing narratives of these experiments while bringing to life the men and women whose brilliance and self sacrifice shaped the outcome of the war including their personal relationships with one another and the ways they faced skepticism and danger in their quest to enable Allied troops to breathe underwater The riveting science leading up to D Day has been classified for generations but Chamber Divers finally brings these scientists stories and their heroism to light **Tirpitz** Daniel Knowles,2018-04-17 **Australia's Dambusters** Colin
