Social Behaviour:

Social Behaviour of Children Ralph E. S. Tanner, 2007 Contents Acknowledgements 1 Introduction 2 Irregularity and Indistinct socialisation 3 Ethology and pro social behaviour 4 Anthropology and pro social behaviour 5 Social environments a typology 6 Methodology the difficulties of data collection 7 Language and pro social development 8 Change and the pro social behaviour of the growing child 9 Social and physical environmental variations affecting the growing child 10 Parental care and the scarcity of uniformities 11 Education 12 Anti social behaviour 13 Generational relations and pro social behaviour 14 The transition in moral development Bibliography Index

The behaviour of children within ages defined in most countries without regard to biological maturity or social usefulness is often concentrated on their failure and the failure of their carers to conform to what their societies expect of them This study attempts to show that children and their carers are genetically and ethologically channelled into behaviour to support the small groups in which they live For most of our known global history children have been seen as economic social and status assets to these small groups and their value assessed in proportion to their eventual contribution as adults They are not taught to behave in contributory ways but are absorbed into their need to be useful in terms of all those with whom they associate Cross culturally the growth of individualism and the decline of usefulness of children for their parents have led to pro social behaviour being much reduced to immediate benefits to children and for the small group in which they spend less and less time Teaching children to be useful to an impersonal society in which they have little interest is an industry in modern states Perhaps our conclusion must be that children will only behave in ways that their society deems correct when they sense on their own that it is profitable to do so The ethical values which have historically maintained the necessary unity of the small group have faded with the growth of survival through secondary employment and state welfare provisions

Tackling anti-social behaviour Great Britain: National Audit Office, 2006-12-07 Anti social behaviour encompasses a broad range of behaviours including nuisance behaviour intimidation and vandalism Seventeen per cent of the population perceive high levels of anti social behaviour in their area with the young and the less well off being disproportionately affected at a cost to government agencies of responding to reports of anti social behaviour in England and Wales of around 3 4 billion per year This report examines the work of the Home Office's Anti Social Behaviour Unit set up in 2003 and measures introduced by the Home Office since 1997 to tackle anti social behaviour focusing on the impact of three of the most commonly used interventions warning letters Acceptable Behaviour Contracts and Anti Social Behaviour Orders Using a sample of 893 cases the report found that the majority of people who received one of these interventions did not re engage in anti social behaviour but there were a number of perpetrators for whom interventions had limited impact with about 20 per cent of the sample having received 55 per cent of the interventions issued Recommendations include that the Home Office should undertake formal evaluation of the success of different interventions and the impact of combining these with support services at the local level International research suggests that preventive
