The Vested Interests and the Common Man Thorstein Veblen, 2010-10-27 This work presents some of Veblen s core ideas in a short accessible and typically witty form His well known view that the business financial interests work at cross purposes to manufacturing is concisely developed and presented here He also takes some care to diagnose the why of this condition offering ideas on how a range of 18th Century

legal and cultural norms came to be undermined by new technical and social developments without being superseded or updated by a new culture In other words we see manufacturing economies operating inside of obsolete cultural constructs causing much friction and distress One of Veblen s more interesting and less discussed ideas is also developed here the private use made of intangible capital and its conversion into income streams through capitalization in bond issues and other financial instruments Veblen s insights on the relationship between owners and managers finance and production community and property are pungently stated and lie outside of any convenient pigeonhole Well worth reading 100 years after publication and applicable to elements of today s economic situation
