ECOOP - Object-Oriented Programming Erik Ernst,2007-08-13 This book constitutes the refereed proceedings of the 21st European Conference on Object Oriented Programming ECOOP 2007 held in Berlin Germany in July August 2007 The 25 revised full papers presented together with 3 invited talks were carefully reviewed and selected from a total of 135 final submissions The papers are organized in topical sections on types runtime implementation empirical studies programs and predicates language design inheritance and derivation aspects as well as language about language *Web Based Project Coaching* Yuriy Taranovych,2013-05-24 The traditional project coaching takes place mostly in a number of face to face coaching sessions However under conditions of time pressure in IT projects a physical presence of coaches could form a bottleneck These facts led to the idea of using Internet technologies to support the project coaching The benefits of the web based project coaching reside in the ubiquitous availability of coaches To enable the web coaching a flexible support platform is required The elaboration of requirements design implementation and evaluation of such a platform is the goal of this dissertation The elaborated concept was applied and evaluated in real IT projects The numerous findings and implications could be gained on the empirical basis **Advanced Information Systems Engineering** Anne Banks Pidduck,John Mylopoulos,Carson C. Woo,M.T. Ozsu,2003-08-01 The explosive growth of the Internet and the Web have created an ever growing demand for information systems and ever growing challenges for Information Systems Engineering The series of Conferences on Advanced Information Systems Engineering CAiSE was launched in Scandinavia by Janis Bubenko and Arne Solvberg in 1989 became an important European conference and was held annually in major European sites throughout the 1990s Now in its 14th year CAiSE was held for the first time outside Europe showcasing international research on information systems and their engineering Not surprisingly this year the conference enjoyed unprecedented attention In total the conference received 173 paper submissions the highest number ever for a CAiSE conference Of those 42 were accepted as regular papers and 26 as short poster papers In addition the conference received 12 proposals for workshops of which 8 were approved while 4 tutorials were selected from 15 submissions The technical program was put together by an international committee of 81 experts In total 505 reviews were submitted with every member of the committee contributing Decision on all submissions were reached at a program committee meeting in Toronto on January 26 27 2002 Workshop and tutorial proposals were handled separately by committees chaired by Patrick Martin workshops and Jarek Gryz and Richard Paige tutorials We wish to extend a great THANK YOU to all members of the program and organizing committees for their volunteer contributions of time and expertise The fact that so many busy and famous people took the trouble to help us with the organization of this conference and the formation of its technical program speaks well for the future of CAiSE and the field of Information Systems Engineering **Recent Advances in Information and Communication Technology 2019** Pongsarun Boonyopakorn,Phayung Meesad,Sunantha Sodsee,Herwig Unger,2019-05-11 This book presents the latest

research on computer recognition systems Over the last few years computer scientists engineers and users have been confronted with rapid changes in computer interfaces and in the abilities of the machines and the services available And this is just the beginning based on recent research findings we can expect more significant advances and challenges in the next decade Achievements in the area of artificial intelligence have made an important major contribution to these developments Machine learning natural language processing speech recognition image and video processing are just some of the major research and engineering directions that have made autonomous driving language assistants automatic translation and answering systems as well as other innovative applications such as more human oriented interfaces possible Those developments also reflect economic changes in the world which are increasingly dominated by the needs of enhanced globalization international cooperation including its competitive aspects and emerging global problems
