Time And Experience:

On the Experience of Time Robert Evan Ornstein,1975 What would you do if you found something that doesn't belong to you Can you be honest and return it to the rightful owner Find out what Ed does when he comes across something that doesn't belong to him *Time and Experience* Peter McInerney,2010-06-17 An analysis of the philosophy of time *Felt Time* Marc Wittmann,2017-04-07 An expert explores the riddle of subjective time from why time speeds up as we grow older to the connection between time and consciousness We have widely varying perceptions of time Children have trouble waiting for anything Are we there yet Boredom is often connected to our sense of time passing or not passing As people grow older time seems to speed up the years flitting by without a pause How does our sense of time come about In *Felt Time* Marc Wittmann explores the riddle of subjective time explaining our perception of time whether moment by moment or in terms of life as a whole Drawing on the latest insights from psychology and neuroscience Wittmann offers a new answer to the question of how we experience time Wittmann explains among other things how we choose between savoring the moment and deferring gratification why impulsive people are bored easily and why their boredom is often a matter of time whether each person possesses a personal speed a particular brain rhythm distinguishing quick people from slow people and why the feeling of duration can serve as an error signal letting us know when it is taking too long for dinner to be ready or for the bus to come He considers the practice of mindfulness and whether it can reduce the speed of life and help us gain more time and he describes how as we grow older subjective time accelerates as routine increases a fulfilled and varied life is a long life Evidence shows that bodily processes especially the heartbeat underlie our feeling of time and act as an internal clock for our sense of time And Wittmann points to recent research that connects time to consciousness ongoing studies of time consciousness he tells us will help us to understand the conscious self [The Personal Experience of Time](#) B. Gorman,2013-05-07 **The Experience of Time** Jorge Canestri,Leticia Glocer Fiorini,2018-03-21 In contemporary psychoanalysis the concepts of time and history have become increasingly complex It is evident that this trend offers us an opportunity to think about the intercrossing of the different temporal dimensions imbuing the subject an inevitable aspect of the analytic process History is time past but what is recovered is now the working through of the subject history which carries the mark of both passing time and re-signifying time It is precisely the notion of history that gains different dimensions when a purely deterministic analysis is disassembled Continuities and breaks are found between subjective time and chronological time between the inevitable decrepitude of the biological body with the passing of time and the timelessness of the unconscious between linear circular times and retroactive re-signification between facts screen memories memory and the work of constructing history between the times of repetition and the times of difference between reversible and irreversible time between the timelessness of the unconscious and the temporalities of the ego **Time and the Experience of Time** Heribert Blass,Leopoldo Bleger,Joëlle Picard,2025-12-23 With particular reference to neurobiology and

neuroscience this book explores a psychoanalytic understanding of time and how ideas of time affect our experiences in clinical practice and in everyday life The contributions examine new perspectives on numerous phenomena associated with the perception of time In addition to the physics based discussion of whether time and a now exist at all whether the existence of time can be proven neuroscientifically or how historical forms of the relationship to time develop the authors consider memory forgetting or regression the emergence of the past in the present and the anticipation of the future as well as mental development and the psychoanalytical process particularly from the aspect of presence The book shows how psychoanalysis can escape scientific isolation and develop further in a lively mutually enriching exchange with other sciences Drawing on scientific insights as well as the latest psychoanalytic thinking this is essential reading for all psychoanalysts psychotherapists and anyone wanting a deeper understanding of the place of time in our lives

The Human Experience of Time Charles M. Sherover, 2001 First published in 1975 and still without equal The Human Experience of Time provides a thorough review of the concept of time in the Western philosophic tradition Encompassing a wide range of writings from the Book of Genesis and the classical thinkers to the work of such twentieth century philosophers as Collingwood and McKeon all with introductory essays by the editor this classic anthology offers a synoptic view of the changing philosophic notions of time

Philosophy of Time and Perceptual Experience Sean Enda Power, 2018-02-06 This book explores the important yet neglected relationship between the philosophy of time and the temporal structure of perceptual experience It examines how time structures perceptual experience and through that structuring the ways in which time makes perceptual experience trustworthy or erroneous Sean Power argues that our understanding of time can determine our understanding of perceptual experience in relation to perceptual structure and perceptual error He examines the general conditions under which an experience may be sorted into different kinds of error such as illusions hallucinations and anosognosia Power also argues that some theories of time are better than others at giving an account of the structure and errors of perceptual experience He makes the case that tenseless theory and eternalism more closely correspond to experience than tense theory and presentism Finally the book includes a discussion of the perceptual experience of space and how tenseless theory and eternalism can better support the problematic theory of naive realism *Philosophy of Time and Perceptual Experience* originally illustrates how the metaphysics of time can be usefully applied to thinking about experience in general It will appeal to those interested in the philosophy of time and debates about the trustworthiness of experience

Awareness **The Psychology of Time Perception** John Wearden,2016-06-09 How do people perceive time This book presents a wealth of contemporary and classical research including some of the history and philosophy of time perception Influential internal clock based models of time perception receive an in depth but non technical introduction and discussion The role of cognition and emotion in perceiving time is also explored as well as questions derived from time experience in daily life such as why time seems to pass more quickly in one situation rather than another Classical and modern research on timing in children is reviewed as well as work on time perception and time experience in older people Leading recent models of animal timing are also discussed in a non mathematical way *On the Experience of Time* Robert E. Ornstein,1980-01 How do we experience time What do we use to experience it In a series of remarkable experiments Robert Ornstein shows that it is difficult to maintain an inner clock explanation of the experience of time postulates a cognitive information processing approach This approach alone makes sense out of the very different data of the experience of time in particular of the experience of duration the lengthening of duration under LSD for example or the effects of an experience felt to be a success rather than a failure time in sensory deprivation the time order effect or the influence of the administration of a sedative or stimulant drug Contents The Problem of Temporal Experience The Sensory Process Metaphor The Storage Size Metaphor Four Studies of the Stimulus Determinants of Duration Experience Two Studies of Coding Processes Duration Experience Three Studies of Storage Size Summary Conclusion Some Speculation on Future Directions **Spiritual Information** Charles L. Harper,2005-06 Spiritual Information is a collection of one hundred essays that explore a portion of the vast interdisciplinary approaches to the study of science and religion Individually and together the essays show how the study of ourselves our planet and the universe helps us understand our place as spiritual beings within God s universe The book is a tribute to Sir John Templeton and his pioneering commitment toward new research that results in one hundredfold more spiritual information than humankind has ever possessed before It begins with essays that reflect on Sir John s principal domains of interest and expertise free enterprise based finance and accelerating spiritual progress Themes of the sections are Science Religion Dialogue Cosmology Physics and Astronomy Mathematics Musicology and Speculation Biological Evolution the Human Being Social Evolution the Human Mind and Heart Religion and Health The Nature of the Divine Theology and Philosophy Faith Traditions Sir John s leadership has enabled us to edge ever closer to the frontier where knowledge meets wisdom at the threshold of ultimate reality notes the editor in the preface to this volume As Spiritual Information presents an overview of how far we have come in the science and religion dialogue it also opens windows to the vast possibilities for additional research and further advances in spiritual information *The Structure of Time* Vyvyan Evans,2003 One of the most enigmatic aspects of experience concerns time Since pre Socratic times scholars have speculated about the nature of time asking questions such as What is time Where does it come from Where does it go The central proposal of *The Structure of Time* is that time at base constitutes a phenomenologically real experience Drawing on

findings in psychology neuroscience and utilising the perspective of cognitive linguistics this work argues that our experience of time may ultimately derive from perceptual processes which in turn enable us to perceive events As such temporal experience is a pre requisite for abilities such as event perception and comparison rather than an abstraction based on such phenomena The book represents an examination of the nature of temporal cognition with two foci i an investigation into pre conceptual temporal experience and ii an analysis of temporal structure at the conceptual level which derives from temporal experience

"Silence, Music, Silent Music " Nicky Losseff,2017-07-05 The contributions in this volume focus on the ways in which silence and music relate contemplate each other and provide new avenues for addressing and gaining understanding of various realms of human endeavour The book maps out this little explored aspect of the sonic arena with the intention of defining the breadth of scope and to introduce interdisciplinary paths of exploration as a way forward for future discourse Topics addressed include the idea of silent music in the work of English philosopher Peter Sterry and Spanish Jesuit St John of the Cross the apparently paradoxical contemplation of silence through the medium of music by Messiaen and the relationship between silence and faith the aesthetics of Susan Sontag applied to Cage s idea of silence silence as a different means of understanding musical texture ways of thinking about silences in music produced during therapy sessions as a form of communication music and silence in film including the idea that music can function as silence and the function of silence in early chant Perhaps the most all pervasive theme of the book is that of silence and nothingness music and spirituality a theme that has appeared in writings on John Cage but not in a broader sense in scholarly writing The book reveals that unexpected concepts and ways of thinking emerge from looking at sound in relation to its antithesis encompassing not just Western art traditions but the relationship between music silence the human psyche and sociological trends ultimately providing deeper understanding of the elemental places both music and silence hold within world philosophies and fundamental states of being Silence Music Silent Music will appeal to those working in the fields of musicology psychology of religion gender studies aesthetics and philosophy

Experiencing Time Simon Prosser,2016 Our engagement with time is a ubiquitous feature of our lives We are aware of time on many scales from the briefest flicker of change to the way our lives unfold over many years But to what extent does this encounter reveal the true nature of temporal reality To the extent that temporal reality is as it seems how do we come to be aware of it And to the extent that temporal reality is not as it seems why does it seem that way These are the central questions addressed by Simon Prosser in Experiencing Time These questions take on a particular importance in philosophy for two reasons Firstly there is a view concerning the metaphysics of time known as the B theory of time according to which the apparently dynamic quality of change the special status of the present and even the passage of time are all illusions Instead the world is a four dimensional space time block lacking any of the apparent dynamic features of time

If the B theory is correct as the book argues then it must be explained why our experiences seem to tell us otherwise Secondly experiences of temporal features such as changes rates and durations are of independent interest because of certain puzzles that they raise the solutions to which may shed light on broader issues in the philosophy of mind

Philosophy of Time and Perceptual Experience Sean Enda Power, 2018-02-14 This book explores the important yet neglected relationship between the philosophy of time and the temporal structure of perceptual experience It examines how time structures perceptual experience and through that structuring the ways in which time makes perceptual experience trustworthy or erroneous Sean Power argues that our understanding of time can determine our understanding of perceptual experience in relation to perceptual structure and perceptual error He examines the general conditions under which an experience may be sorted into different kinds of error such as illusions hallucinations and anosognosia Power also argues that some theories of time are better than others at giving an account of the structure and errors of perceptual experience He makes the case that tenseless theory and eternalism more closely correspond to experience than tense theory and presentism Finally the book includes a discussion of the perceptual experience of space and how tenseless theory and eternalism can better support the problematic theory of naive realism *Philosophy of Time and Perceptual Experience* originally illustrates how the metaphysics of time can be usefully applied to thinking about experience in general It will appeal to those interested in the philosophy of time and debates about the trustworthiness of experience

The Varieties of Temporal Experience Michael D. Jackson, 2018-04-10 What does it mean to live in time between the unforeseeable and the irreversible In *The Varieties of Temporal Experience* Michael Jackson demonstrates the significance of a phenomenology of time for ethnography philosophy and history through a multifaceted consideration of the gap between our cultural representations of temporality and the bewildering multiplicity of our experience of being in time Jackson explores temporality in a subjective mode as a form of literary anthropology The first part of the book tells the story of John Joseph Pawelka whose 1910 escape from prison and subsequent disappearance became one of New Zealand's great unsolved mysteries discussing what it reveals about the interplay of popular stories hidden histories and media narratives in constructing allegories of national and moral identity In the second Jackson reflects on journeys up and down the islands of New Zealand touching on the ways that personal stories are interwoven with social and historical events Throughout this groundbreaking book Jackson juxtaposes philosophy history and ethnography in an attempt to do justice to the extraordinary variety of temporal experience at the same time exploring the ethical and existential quandaries that arise from the complexity of lived time

[In Search of Time](#) Jacob Dahl, 2023-04-04 Time is relative situation dependent location and culturally dependent and very much subjective Yet we treat it as if it were objective We share standardized time and we are dependent on it for almost everything we do When it comes to waking up business meetings transportation finding your way via GPS seeing friends watching a show we are all dependent on a standardized notion of time and time measurement The

future gives us hope and deadlines drive innovation and productivity Time drives us forward and we talk about time all the time The word time is the most used noun in English followed by year in third place and day in fifth We are obsessed with it for a lot of very good and practical reasons The book looks at time through different perspectives ranging from physics history philosophy anthropology to art business politics biology and psychology The author's aim is to bring us closer to the nature and our experience of time by looking at it from different lenses to improve our understanding of what time is and what it is not and to use that knowledge to improve how we organize ourselves around time It's by better understanding time's nature and experience that we can keep the positive and productive elements of time and get rid of the unhealthy time practices in our lives

[The Time Slip Experience](#) Anthony Meyer, 2021-11-07 The possibility of time travel has long fascinated the public Although physicists tell us such a thing is theoretically possible any practical application of a time machine will remain in the realms of science fiction for the foreseeable future However as this book shows there are many documented cases where people have been unwittingly transported back or sometimes forward in time They find themselves gazing upon scenes not of their era and in some cases dialogue with strangers encountered in the time slip takes place This book explores a number of fascinating cases and seeks to identify triggers and mechanisms involved in the time slip phenomenon
