Subsistence Agriculture and Economic Development Clifton R. Wharton,Wharton, Jr,2017 One of the more perplexing problems of economic development is helping subsistence farmers break away from production simply for home consumption to become commercial farmers producing more and more for sale in the marketplace Although subsistence farms occupy 40 percent of the worlds cultivated land and support half of mankind facts about them and programs to increase their output are scattered Subsistence Agriculture and Economic Development provides a unique overview of these difficulties and their significance to economic development It is the first book to subject subsistence agriculture to rigorous multi disciplinary examination and to bring to light new theory and empirical evidence directed toward solving the problem This volume contains original chapters by forty leading social scientists and agricultural specialists who summarize contemporary theory fact and policy on the problems of developing agriculture from subsistence to a commercial basis Each contributor speaks from one or more of the relevant standpoints of economics sociology agronomy political science anthropology and social psychology There emerges a clear meaningful picture of the subsistence farmer and the problems involved in changing his attitudes methods of production and economic and social environment Broad in scope documented with pertinent case studies and far reaching in its guidelines for future research and policy this work should be read by all concerned with increasing food production and with economic development This is an area of special concern in the uses of food products as the basis for new energy resources an issue of increasing importance in the advancing use of ethanol as a fuel drawn from corn products Provided by publisher

Property Rights and Indian Economies Terry Lee Anderson, 1992 Most research on American Indian economies seeking to explain why Indians have remained near the bottom of the economic ladder has concentrated on resource endowments This approach has focused policy attention on creating government programs to expand resource exploitation either by encouraging non Indians to develop reservation resources or by directly enhancing reservation physical and human capital stocks However these policies have ignored institutions and the important role of local customs and privileges This book explicitly considers this institutional context and focuses on the rules that determine who controls physical and human resources and who benefits from their use Applying the analytical tools from economics law anthropology and political science the authors consider the three main ingredients necessary for successful economies stable government minimal bureaucracies and the rule of law

Graduate School of Design. Library, 1974 **Proposed Outer Continental Shelf Oil and Gas Lease Sale, Norton Sound**, 1982 **Subsistence Economics in Alaska** Robert J. Wolfe, Robert J. Walker, 1987 This paper describes the productivity and geographic distribution of subsistence harvests in Alaska during the 1980s Subsistence harvests of a statewide sample of 98 communities are presented analyzed by size composition and locations The analysis indicates that subsistence harvests of fish land mammals marine mammals and other wild resources are making substantial contributions to the economics of most rural communities in Alaska Community harvest levels tend to increase in areas away from urban centers not connected by roads to urban areas with lower degrees of settlement entry and with lower mean personal incomes These relationships suggest that certain types of economic development can create conditions which diminish subsistence productivity Construction of roads and settlement entry into roaded areas produce changes associated with lower subsistence harvests including increased competition for wild resources

increased habitat alteration and changing community economic orientations away from mixed subsistence market adaptations By recognizing the substantial contributions subsistence harvests make to the regional economies of the state economic development might be planned in ways which enhance rather than erode the rural subsistence base of the state
