Heaman,David Tough,2020-09-17 Canadians can never not argue about taxes From the Chinese head tax to the Panama Papers from the National Policy to the Canada United States Mexico Agreement tax grievances always inspire private resentments and public debates But if resentment and debate persist the terms of the debate have continually altered and adapted to reflect changing social economic and political conditions in Canada and the wider world The centenary of income tax is the occasion for Canadian scholars to wrestle with past and present debates about tax equity efficiency and justice Who Pays for Canada explores the different ways governments can and should tax their peoples and evaluates how well Canada has done so It brings together a diverse group of perspectives from academia law economics political science history geography philosophy and accountancy and from the wider world of activists and public servants It asks how Canada compares to other countries and how other countries especially the United States influence Canadian tax policies It also surveys internal tax tensions and politics through the lenses of region and jurisdiction as well as race class and gender Reasoning from tax perplexities and reforms in the past and the present it argues that fair taxation requires an informed populace and a democratically inclined public will Above all this book serves as a reminder that it is not only what counts as fair that is important but how fairness is evaluated Revealing how closely tax policy is tied to mainstream politics human rights and morality Who Pays for Canada represents new perspectives on a matter of tremendous national urgency *State of inequality: HIV, tuberculosis and malaria* ,2021-12-08 This report delivers the first systematic analysis of available data to make an authoritative statement on the status of inequality in HIV AIDS TB and malaria Monitoring inequalities in HIV AIDS tuberculosis and malaria in terms of burden prevention and treatment helps to pinpoint where there may be gaps and identify population groups that are being left behind and support countries and international organizations to tailor policies programmes and service provision to close these gaps The objectives of the report are to assess the latest status and change of inequality in HIV AIDS malaria and tuberculosis globally identify good performing countries in terms of equity as well as countries that have room for improvement and investigate the association of inequality with inequality in other health topics social determinants of health and access to health facilities This report supports Output 4.1.2 of GPW 13 GPW 13 impacts and outcomes global and regional health trends Sustainable Development Goal indicators health inequalities and disaggregated data monitored Similar analysis have been previously conducted and published for other disease topics including State of inequality Childhood immunization and State of inequality Reproductive maternal newborn and child health **Africa** Laurel A.
