**Knowledge and Innovation in Business and Industry** Håkan Håkansson, Alexandra Waluszewski, 2007-05-09

Provocative and reflective this volume on the notion of knowledge and innovation in the business industry provides readers with a holistic approach to the subject of knowledge Structuring their arguments around four case studies of innovation within four entirely different contexts Håkansson and Waluszewski invite the business minded reader to consider the costs of adopting new knowledge and innovation within a business setting This book questions the long held assumption that new knowledge and innovation are universally advantageous follows the tremor of an innovation as new knowledge reverberates through or is dampened by the larger economic community including cultural structures the industrial standards and the foundational assumptions that rule a particular economic domain focuses in particular on the interfaces where the innovative agent connects to its customers suppliers and competitors An ideal reference source for postgraduate students taking advanced courses in science and technology studies innovation management industrial marketing and purchasing technological development and innovation systems

**Fuzzy Rationality** Kofi Kissi Dompere, 2009-07-22 Philosophy involves a criticism of scientific knowledge not from a point of view ultimately different from that of science but from a point of view less concerned with details and more concerned with the harmony of the body of special sciences Here as elsewhere while the older logic shut out possibilities and imprisoned imagination within the walls of the familiar the newer logic shows rather what may happen and refuses to decide as to what must happen Bertrand Russell At any particular stage in the development of humanity knowledge comes up against limits set by the necessarily limited character of the experience available and the existing means of obtaining knowledge But humanity advances by overcoming such limits New experience throws down the limits of old experience new techniques new means of obtaining knowledge throw down the limits of old techniques and old means of obtaining knowledge New limits then once again appear But there is no more reason to suppose these new limits absolute and final than there was to suppose the old ones absolute and final
