Thinking Socratically:

Thinking Socratically Sharon Schwarze, Harvey Lape, 2012 ALERT Before you purchase check with your instructor or review your course syllabus to ensure that you select the correct ISBN Several versions of Pearson's MyLab check with the seller before completing your purchase Used or rental books If you rent or purchase a used book with an access code the access code may have been redeemed previously and you may have to purchase a new access code Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code Check with the seller prior to purchase Critical Thinking Skills in Everyday Context The Socrates Model Thinking Socratically is a treatment of critical thinking rather than an informal logic textbook It emphasizes a philosophical reflection on real issues from everyday life in order to teach students the skills of critical thinking in a commonplace context that is easy to understand and certain to be remembered Teaching and Learning Experience Improve Critical Thinking Thinking Socratically contextualizes the presentation of critical thinking topics through easy to understand information and shows rather than just tells students how to be critical thinkers by encouraging them to follow Socrates as a model Engage Students Thinking Socratically exposes students to a variety of readings listed after expository material Venn diagrams chapter end summaries etc in order to outline important concepts and learning tools needed for useful reasoning Support Instructors Teaching your course just got easier You can create a Customized Text or use our Instructor's Manual or PowerPoint Presentation Slides Plus Thinking Socratically is organized around topics for ease of assignments and uses standard terminology to eliminate student confusion

Thinking Socratically Sharon Schwarze, Harvey Lape, 1997 A different approach to critical thinking both conceptually and pedagogically Thinking Socratically encourages students in a user friendly way to improve their own natural reasoning skills An enjoyable collection of readings presents students with real life situations that raise questions about the basic assumptions of rationality naturally engaging them in open dialogue the hallmark of the rational person The situations range from the problem of evidence at a trial to the absence of an explanation of why two children died in the same day care center on the same day While the important objectives of more standard texts are not ignored this book goes beyond the usual Thinking Socratically considers topics that are not generally covered by other textbooks such as the advantages of rationality over irrationality the limits of rational thinking the web of belief the values implicit in science the weaknesses of dogmatic and relativistic thinking Thinking Socratically stresses understanding rather than gimmickry and rule memorization It focuses on the connections between language and the world and what makes statements about the world acceptable or unacceptable This is not an informal logic text but a genuine critical thinking text

The Socratic Classroom Sarah Davey Chesters, 2012-09-13 This book provides a framework for a collaborative inquiry based approach to teaching and learning suitable not only for formal educational settings such as the school classroom but for all educational settings For teachers educationalists philosophers and philosophers of education The

Socratic Classroom presents a theoretical as well as practical exploration of how philosophy may be adopted in education. The Socratic Classroom captures a variety of philosophical approaches to classroom practice that could be broadly described as Socratic in form. There is an exploration of three distinct approaches that make significant contributions to classroom practice: Matthew Lipman's Community of Inquiry, Leonard Nelson's Socratic Dialogue, and David Bohm's Dialogue. All three models influence what is termed in this book as Socratic pedagogy. Socratic pedagogy is multi-dimensional and is underpinned by generative, evaluative, and connective thinking. These terms describe the dispositions inherent in thinking through philosophical inquiry. This book highlights how philosophy as inquiry can contribute to educational theory and practice while also demonstrating how it can be an effective way to approach teaching and learning.

Audience: This publication is suited to educators, teacher educators, philosophers of education, and philosophers in general. It has a theoretical and practical focus, making it truly interdisciplinary.

On Søren Kierkegaard Edward F. Mooney, 2017-03-02

Tracing a path through Kierkegaard's writings, this book brings the reader into close contact with the texts and purposes of this remarkable 19th-century Danish writer and thinker. Kierkegaard writes in a number of voices and registers: as a sharp observer and critic of Danish culture, or as a moral psychologist, and as a writer concerned to evoke the religious way of life of Socrates, Abraham, or a Christian exemplar. In developing these themes, Mooney sketches Kierkegaard's Socratic vocation, gives a close reading of several central texts, and traces *The Ethical Sublime* as a recurrent theme. He unfolds an affirmative relationship between philosophy and theology, and the potentialities for a religiousness that defies dogmatic creeds, secular chauvinisms, and restrictive philosophies.

Introduction to Oracy Jackie Holderness, 1998-05-01

Oracy is a subject currently undergoing examination due to the emphasis placed upon it by the National Curriculum. With an emphasis on practice but embracing the major theoretical issues involved, this book contains numerous exercises examining the issues surrounding oracy in schools. It describes the many ways in which teachers can encourage pupils to talk, using picture books, media-based discussions, and English as a second language.

The Digital Turn in Higher Education David Kergel, Birte Heidkamp, Patrik Kjærdsdam, Tellés, Tadeusz Rachwał, Samuel Nowakowski, 2017-10-24

The book deals with the digital turn in higher education. One aim of this book is to address the challenge by providing a multi-disciplinary international perspective on higher education during the digital turn. It presents epistemological, ethical, and theoretical approaches and best practice examples from universities in different countries using different learning strategies. The book can be understood as an international and interdisciplinary collection providing heuristic strategies for handling the digitalization of higher education in theory and in practice.

Knowledge, Control and Critical Thinking in Singapore Leonel Lim, 2015-09-07

This book examines how critical thinking is regulated in Singapore through the process of what the influential sociologist of education Basil Bernstein termed pedagogic recontextualization. The ability of critical thinking to speak to alternative possibilities and individual autonomy, as well as its assumptions of a liberal arrangement of society, is problematized in Singapore's socio

political climate By examining how such curricular discourses are taken up and enacted in the classrooms of two schools that cater to very different groups in society the book foregrounds the role of traditional high status knowledge in the elaboration of class formation and develops a critical understanding of post developmental state initiatives linked to the parable of modernization in Singapore Knowledge Control and Critical Thinking in Singapore offers chapters on Critical Thinking and the Singapore State Meritocracy Illiberalism and Neoliberalism Sacred Knowledge and Elite Dispositions Recontextualizing Critical Thinking in an Elite School Power Knowledge and Symbolic Control Official Pedagogic Identities and the Politics of Recontextualization This book will appeal to scholars in comparative education studies curriculum studies and education reform It will also interest scholars engaged in Asian studies who are struggling to understand issues of education policy formation and implementation particularly in the areas of critical thinking and other knowledge skills **Socratic Dialogue**

and Ethics Jens Peter Brune,Dieter Krohn,2005 This volume presents the proceedings of the 3rd International Conference on Socratic Dialogue held in Loccum Germany in 2000 convened by the Philosophical Political Academy PPA Germany the Society of Socratic Facilitators GSP Germany the Society for the Furtherance of Critical Philosophy SFCP UK and the Dutch Network of Socratic Facilitators The proceedings focus on what Socratic Dialogue can contribute to ethical questions in different social fields They range from philosophising with children to management consultancy and refer to projects and experiences with Socratic Dialogue in different countries demonstrating how to conduct ethical discourse on a global level
