**Virtual Coaching to Improve Group Relationships**

William J. Rothwell, Cho Hyun Park, 2020-12-28 Process consultation invented by Edgar Schein is both a skill and an organization development change effort As a skill process consultation means the ability to observe and provide feedback about small group dynamics to a work group about how well group members interact and how to improve that interaction Just as facilitators devote their time to in one word asking process consultants devote their time to in one word watching at an expert level As a change effort process consultation is a concerted effort to help members of a group work together more effectively For that reason the word process in this context should be interpreted to mean interpersonal interaction in small groups Historically process consultation has focused attention on face to face groups and their group dynamics But times are changing More work is done online or in blended online and onsite groups than face to face alone A 2017 survey of over 25 000 workers in 12 countries revealed that 62% of global workers are now working flexibly with some residential work and some virtual work The same survey found that workers believe that flexible work arrangements make them more productive and that 48% of survey respondents reported that their virtual interactions include representatives of other cultures It is true

that for workers who can discipline themselves and manage distractions at home virtual work can be more productive when commuting time is eliminated and workplace distractions are minimized Virtual work has the advantage of reducing the need for childcare slashing work wardrobe costs and cutting unproductive stressful commuting time Despite how modes of working together have changed over the years ranging from face to face to some degree of virtual video conference audio conference print only collaboration and many blended combinations and the growing need for finding ways to help people work together more effectively there has been no practical guideline of process consultation in a virtual or mixed work setting since Schein s process consultation initially focused on group dynamics in face to face settings Therefore this book aims to provide practical approaches to process consultation helping group members discover more effective ways of working together in blended virtual residential and cross cultural settings Essentially this book provides a practical how to guide for virtual coaching using step by step procedural approaches cases and helpful platforms technologies and tools It also provides information about how to use technology to support the process of improving virtual or mixed group relationship
