of family violence develops the thesis that the ultimate origins and current distribution of child abuse may be found in a single principle of evolutionary biology A paper examining behavior patterns of aggression attachment and violence questions Sutherland s subculture of violence theses by showing how pursuits of basic sociability can result in violent behavior contrary to the values of the group Papers on juvenile delinquency and group home treatment represent approaches using a combination of psychological learning principles and differential association NCJRS modified Explaining Crime Gwynn Nettler,1984 Crime Theory L. Biderman,James P. Lynch,2012-12-06 The prominence achieved by the novel measure of households touched by crime when it was introduced into the National Crime Survey NCS in 1981 was responsible for renewed attention to comparisons between the crime rates reported by the NCS and the Uniform Crime Reports UCR The new NCS measure suggested that crime was declining this at a time of widespread awareness that the UCR Index was at all time highs Comparisons of the NCS and UCR in The New York Times 1981 and the Washington Post 1981 had the unfortunate consequence of reviving old and usually ill informed arguments about which is the better measure of trends in crime More recent discrepant changes of the two measures in 1986 and 1987 rekindled the debate although with somewhat diminished stridency The efforts of criminological statisticians to develop an appreciation for the two statistical systems as quite different but complementary measures have suffered a setback in these debates but an opportunity is also afforded to improve the understanding of crime statistics by officials the media and the public The need remains for the Bureau of Justice Statistics BJS the Federal Bureau of Investigation FBI and the research community to explain in quantitative terms the ways in which the two systems attend to different albeit overlapping aspects of the crime problem
