oral communication and performance Factual truth was essential but inseparable from interpreted truth during the course of investigation transmission and composition The gospel tradition developed through a subtle interaction between the unique historic events of the past and the various circumstances of the present The narrative and historical dimensions of a text cannot be separated because the semantic codes of a text are often located in the culture and not in the text itself The gospels are therefore the synthesis of history and story intertwining the horizons of the past and of the present in their own right
