Agent-Based Approaches in Economic and Social Complex Systems VI Shu-Heng Chen, Takao Terano, Ryuichi Yamamoto, 2011-01-12 Agent based modeling simulation is an emergent approach to the analysis of social and economic systems It provides a bottom up

experimental method to be applied to social sciences such as economics management sociology and politics as well as some engineering fields dealing with social activities This book includes selected papers presented at the Sixth International Workshop on Agent Based Approaches in Economic and Social Complex Systems held in Taipei in 2009 We have 39 presentations in the conference and 14 papers are selected to be included in this volume These 14 papers are then grouped into six parts Agent based financial markets Financial forecasting and investment Cognitive modeling of agents Complexity and policy analysis Agent based modeling of good societies and Miscellany The research presented here shows the state of the art in this rapidly growing field

Uncertainty-aware Integration of Control with Process Operations and Multi-parametric Programming Under Global Uncertainty Vassilis M. Charitopoulos,2020-02-05 This book introduces models and methodologies that can be employed towards making the Industry 4.0 vision a reality within the process industries and at the same time investigates the impact of uncertainties in such highly integrated settings Advances in computing power along with the widespread availability of data have led process industries to consider a new paradigm for automated and more efficient operations The book presents a theoretically proven optimal solution to multi parametric linear and mixed integer linear programs and efficient solutions to problems such as process scheduling and design under global uncertainty It also proposes a systematic framework for the uncertainty aware integration of planning scheduling and control based on the judicious coupling of reactive and proactive methods Using these developments the book demonstrates how the integration of different decision making layers and their simultaneous optimisation can enhance industrial process operations and their economic resilience in the face of uncertainty
