## **Violent Conception:**

The Concept of Violence Mark Vorobej, 2016-02-26 This study focuses on conceptual questions that arise when we explore the fundamental aspects of violence Mark Vorobej teases apart what is meant by the term violence showing that it is a surprisingly complex unwieldy and highly contested concept Rather than attempting to develop a fixed definition of violence Vorobej explores the varied dimensions of the phenomenon of violence and the questions they raise addressing the criteria of harm agency victimhood instrumentality and normativity Vorobej uses this multifaceted understanding of violence to engage with and complicate existing approaches to the essential nature of violence first Vorobej explores the liberal tradition that ties violence to the intentional infliction of harm and that grows out of a concern for protecting individual liberty or autonomy He goes on to explore a more progressive tradition one that is usually associated with the political left that ties violence to the bare occurrence of harm and that is more concerned with an equitable promotion of human welfare than with the protection of individual liberty Finally the book turns to a tradition that operates with a more robust normative characterization of violence as a morally flawed or forbidden response to the ontological fact of human vulnerability This nuanced and in depth study of the nature of violence will be especially relevant to researchers in applied ethics peace studies and political philosophy

**Fighting Words** Hector Avalos, Is religion inherently violent If not what provokes violence in the name of religion Do we mischaracterize religion by focusing too much on its violent side In this intriguing original study of religious violence Prof Hector Avalos offers a new theory for the role of religion in violent conflicts Starting with the premise that most violence is the result of real or perceived scarce resources Avalos persuasively argues that religion creates new scarcities on the basis of unverifiable or illusory criteria Through a careful analysis of the fundamental texts of Judaism Christianity Islam and Hinduism Dr Avalos explains how four scarce resources have figured repeatedly in creating religious violence sacred space e.g. the perception by three world religions that Jerusalem is sacred the creation of holy scriptures believed to be privileged revelations of God's will group privilege stemming from such beliefs as a chosen people or predestination which also creates a group of outsiders and salvation by which concept some are accepted and others rejected Thus Avalos shows religious violence is often the most unnecessary violence of all since the scarce resources over which religious conflicts ensue are not actually scarce or need not be scarce Comparing violence in religious and nonreligious contexts Avalos makes the compelling argument that if we condemn violence caused by scarce resources as morally objectionable then we must consider even more objectionable violence provoked by alleged scarcities that cannot be proven to exist He also examines the Nazi Holocaust and the Stalinist Terror

which have been attributed to the pernicious effects of atheism or secular humanism By contrast Avalos pinpoints underlying religious factors as the cause of these horrific instances of genocidal violence This serious philosophical examination of the roots of religious violence adds much to our understanding of a perennial source of widespread human suffering Hector Avalos Ames IA is associate professor of Religious Studies at Iowa State University the author of five books on biblical studies and religion the former editor of the Journal for the Critical Study of Religion and executive director of the Committee for the Scientific Examination of Religion

**Political Disagreement, Violence and Nonviolence** Greg McCreery, 2023-07-10. Violence and Nonviolence descriptively analyzes numerous examples of theorists' definitions and characterizations of varying types of violence, arguing that a commonsense view of violence and nonviolence is based on paradigm cases that most people generally agree consider as kinds of violence and nonviolence. Beyond these cases, however, McCreery argues that collectives of individuals form into politicized groups that share visions of these types of violence and nonviolence, particularly in terms of what they believe to be legitimate kinds of violence and nonviolence in contrast to illegitimate kinds. An understanding of violence and nonviolence requires a perspectival, relational approach that situates the vulnerable human body as primary. Furthermore, if nonviolence is to succeed as an effective political strategy, then it must work as a kind of violence, at least from the perspective of the adversary.

*Reflections on Violence* Georges Sorel, 1915. In this classic text, the author develops the ideas of violence, myth, and the general strike as the heroic actions of the proletariat.
