Steel Construction:

Recent Trends in Cold-Formed Steel Construction Cheng Yu, 2016-05-27 Recent Trends in Cold Formed Steel Construction discusses advancements in an area that has become an important construction material for buildings. The book addresses cutting edge new technologies and design methods using cold formed steel as a main structural material and provides technical guidance on how to design and build sustainable and energy efficient cold formed steel buildings. Part One of the book introduces the codes specifications and design methods for cold formed steel structures while Part Two provides computational analysis of cold formed steel structures. Part Three examines the structural performance of cold formed steel buildings and reviews the thermal performance acoustic performance fire protection floor vibrations and blast resistance of these buildings with a final section reviewing innovation and sustainability in cold formed steel construction. Addresses building sciences issues and provides performance solutions for cold formed buildings. Provides guidance for using the next generation design method computational tools and technologies. Edited by an experienced researcher and educator with significant knowledge on new developments in cold formed steel construction. **Steel and Composite Structures** Y. C. Wang, C.K. Choi, 2018-05-08 Over 150 papers representing the most recent international research findings on steel and composite structures. Including steel constructions buckling and stability codes composite control fatigue and fracture fire impact joints maintenance plates and shells retrofitting seismic space structures steel structural analysis structural components and assemblies thin walled structures vibrations and wind. A special session is dedicated on codification. A valuable source of information to researchers and practitioners in the field of steel and composite structures. Structural Analysis of Historical Constructions: Anamnesis, Diagnosis, Therapy, Controls Koen Van Balen, Els Verstrynghe, 2016-11-03 Structural Analysis of Historical Constructions Anamnesis diagnosis therapy controls contains the papers presented at the 10th International Conference on Structural Analysis of Historical Constructions SAHC2016 Leuven Belgium 13-15 September 2016. The main theme of the book is Anamnesis Diagnosis Therapy Controls which emphasizes the importance of all steps of a restoration process in order to obtain a thorough understanding of the structural behaviour of built cultural heritage. The contributions cover every aspect of the structural analysis of historical constructions such as material characterization structural modelling static and dynamic monitoring non destructive techniques for on site investigation seismic behaviour rehabilitation traditional and innovative repair techniques and case studies. A special focus has been put on six specific themes: Innovation and heritage Preventive conservation Computational strategies for heritage structures Sustainable strengthening of masonry with composites Values and sustainability and Subsoil interaction. The knowledge insights and ideas in Structural Analysis of Historical Constructions Anamnesis diagnosis therapy controls make this book of abstracts and the corresponding digital full colour conference proceedings containing the full papers must have literature for researchers and practitioners involved in the structural analysis of historical constructions.
