A Practical Example Based on "Tesla"](#) Lukas Wagner,2018-11-29 Essay from the year 2017 in the subject Business economics Business Management Corporate Governance grade 1 0 Tongji University language English abstract Decision making is a fundamental skill for any successful executive But decisions at strategic level are hard to make They require large amounts of resources and commitments which may be irreversible They involve long term consequences that are hard to predict And they require considering multiple often conflicting strategic objectives which are difficult to balance particularly in the presence of risk and uncertainty Research and thinking about modern business strategy emerged as a field of study and practice in the 1960s Prior to that time the words strategy and competition rarely appeared in the most prominent management literature When influential academics in the USA started to think fundamentally about strategic decision making in the 1980s and 90s they made the assumption that everything works in a competitive working free market and developed thereof generic strategy tools that are supposed to work everywhere However Elmes the guest speaker argues that they are not well founded since strategies need to be developed in the respective context of an industry or market This position will be explained in more detail during this essay Especially the determinant of market efficiency meaning how competitive a market is strongly influences the development of strategic decisions There are many industries where government involvement or asymmetric competition need to be considered to make strategic decisions whereby generic strategy tools tend to be ineffective Therefore the key questions for this essay will be firstly what are the traditional concepts of strategy and how have they involved secondly what actually makes a strategy successful and lastly how does it apply in practice *Strategic Decision Making* Felipe A. Csaszar,2015 Strategy is about making decisions decisions such as which industry to enter how to position the firm and its products which resources to develop or to buy who to hire and which organizational structure to use It is no surprise then that much research within the strategy field has studied how strategic decisions are made and how they can be improved The literature addressing these two questions falls under the rubric of strategic decision making SDM This literature focuses on the processes leading to a decision e g how different opinions are taken into account rather than on the

content of the decision e.g. which strategy framework to use to devise the firm's positioning. This entry presents some of the fundamental concepts and tools studied in the field of SDM and ways in which they might be applied by managers.

Business Strategy The Economist, Jeremy Kourdi, 2015-05-26. The effectiveness of a good strategy well implemented determines a business future success or failure. Yet history is full of strategic decisions big and small that were ill conceived, poorly organized and consequently disastrous. This updated guide looks at the whole process of strategic decision making from vision forecasting and resource allocation through to implementation and innovation. Strategy is about understanding where you are now, where you are heading and how you will get there. There is no room for timidity or confusion. Although the CEO and the board decide a company's overall direction, it is the managers at all levels of the organization who will determine how the vision can be transformed into action. In short, everyone is involved in strategy. But getting it right involves difficult choices: which customers to target, what products to offer and the best way to keep costs low and service high. And constantly changing business conditions inevitably bring risks. Even after business strategy has been developed, a company must remain nimble and alert to change and view strategy as an ongoing and evolving process. The message of this guide is simple: strategy matters and getting it right is fundamental to business success.

Decision Making and Business Performance Eric J. Bolland, Carlos J. Lopes, 2018. This breakthrough study examines how business decisions explain successful and unsuccessful performance. Recommendations are made to optimize decision making and projections about the future of decision making and performance are provided.

Uncertainty in Strategic Decision Making Richard J. Arend, 2024-01-03. Knight 1921 defines uncertainty as an informational market failure that while being detrimental to most existing businesses presents possible profitable opportunities for others. This book builds upon that classic work by providing an analysis of the alternative approaches to strategic decision making under such uncertainty. It covers what uncertainty is, why it is important and what connections it has to business and related fields, culminating in a new and comprehensive typology and a valuable guide for how to appropriately address various types of uncertainties even under AI. It clarifies the current terminological and categorical confusion about unknowns while complementing the mathematical probability based approaches that treat uncertainty as knowable, i.e. as risk. It corrects the mistaken approaches that treat unknowables as shapeable or discoverable. This book widens the perspective for viewing uncertainty in terms of its impacts across humanity by offering a shrewder understanding of what roles uncertainties play in human activity. It will appeal to academics across business, economics, philosophy and other disciplines looking for approaches to apply, test and hone for dealing with decision making under uncertainty.

Uncertainty and Strategic Decision Making Kristian J. Sund, Robert J. Galavan, Anne Sigismund Huff, 2016-11-14. In this book leading researchers on Managerial and Organizational Cognition consider the foundations of individual and social cognition and their

effect on strategic decision making
