Exposing the Film Apparatus Giovanna Fossati, Annie Oever, 2025-10-01 Film archives have long been dedicated to preserving movies and they've been nimble in recent years in adapting to the changing formats and technologies through which cinema is now created and presented. This collection makes the case for a further step: the need to see media technologies themselves as objects of conservation, restoration, presentation, and research in both film archives and film studies. Contributors with a wide range of expertise in the film and media world consider the practical and theoretical challenges posed by such conservation efforts and consider their potential to generate productive new possibilities in research and education in the field.

Fashion and Film Peter Bug, 2019-09-17 This book aims to explore various aspects of the use of moving images in fashion retail and fashion apparel companies in store or online. The use of moving images is growing in numbers and in relevance for consumers. Films can be used in various forms by fashion businesses in traditional media like cinema or TV and in modern forms like in social media or moving images in high street stores. The book provides a data-oriented analysis of the state of the art with certain future outlooks. Additional areas of covering fashion in moving images such as fashion company identity films or fashion and music videos are covered in order to get a more complete analysis from a consumer-influenced perspective.
