Plath, 1983 The durability of Japan's industrial products now holds world acclaim But the durability of jobs in Japan despite misleading Western images of lifetime employment is no better than in other industrial nations The group model of Japanese society that has been in fashion in the West confuses the goals of an organization with the personal aims and aspirations of its members Like workers anywhere those in Japan must go through life reconciling their duties to the job with their often conflicting obligations to family to community and to self respect Career outcomes are anything but certain in Japan once we see them from a worker's point of view Work and Lifecourse in Japan is a collection of workers eye level reports on career development in a variety of Japanese organizations and professions In addition there are overview chapters on employment trends in the Japanese economy and on the problems of scheduling one's life events in the demanding milieu of our post industrial world
