Hybrid Predictive Control for Dynamic Transport Problems Alfredo Nunez, Doris Saez, Cristián E. Cortés, 2012-10-03 Hybrid Predictive Control for Dynamic Transport Problems develops methods for the design of predictive control strategies for nonlinear dynamic hybrid discrete continuous variable systems The methodology is designed for real time applications particularly the study of dynamic transport systems Operational and service policies are considered as well as cost reduction The control structure is based on a sound definition of the key variables and their evolution A flexible objective function able to capture the predictive behaviour of the system variables is described Coupled with efficient algorithms mainly drawn from area of computational intelligence this is shown to optimize performance indices for real time applications The framework of the proposed predictive control methodology is generic and being able to solve nonlinear mixed integer optimization problems dynamically is readily extendable to other industrial processes The main topics of this book are hybrid predictive control HPC design based on evolutionary multiobjective optimization EMO HPC based on EMO for dial a ride systems and HPC based on EMO for operational decisions in public transport systems Hybrid Predictive Control for Dynamic Transport Problems is a comprehensive analysis of HPC and its application to dynamic transport systems Introductory material on evolutionary algorithms is presented in summary in an appendix The text will be of interest to control and transport engineers working on the operational optimization of transport systems and to academic researchers working with hybrid systems The potential applications of the generic methods presented here to other process fields will make the book of interest to a wider group of researchers scientists and graduate students working in other control related disciplines

What is the optimal locus of control for social assistance programs? Simons, Andrew M., 2016-04-01 Centralized implementation mandates of Ethiopia's Productive Safety Net Program PSNP require a full and uniform payment to each

person in an eligible household In practice however communities do not receive enough funding to fully implement the program Therefore communities must exercise local discretion in allocating aid We recover the preferences revealed by local communities aid allocations and find they are pro poor allocating more to underprivileged groups with lower wage earning potential e g teenage girls vs teenage boys adult women vs adult men elderly vs working age adults Despite communities pro poor implementation the program with constrained funding does not significantly lower overall poverty rates In simulations with full funding the program reduces poverty in both cases of centralized and decentralized program control using different criteria for the allocation of funds The major policy implication is that the financial scale of the safety net program is more important to poverty reduction than the locus of control over implementation **Light** ,1929 Step Ahead, Indiana Collaboration Project Step Ahead (Program),1991 *Supreme court* , **New step ahead : [split ed.]** Herbert Puchta,2009 *Electrical Dealer* ,1928 **School Management** ,1966 Jan issues include the annual The Directory of registered school suppliers **Biennial Report** Indiana.
