Volume 1 Claudia Maienborn, Klaus von Heusinger, Paul Portner, 2011-07-27 No detailed description available for SEMANTICS MAIENBORN ET AL BD 33 1 HSK E BOOK **Advances in Generative Lexicon Theory** James Pustejovsky, Pierrette Bouillon, Hitoshi Isahara, Kyoko Kanzaki, Chungmin Lee, 2012-12-18 This collection of papers takes linguists to the leading edge of techniques in generative lexicon theory the linguistic composition methodology that arose from the imperative to provide a compositional semantics for the contextual modifications in meaning that emerge in real linguistic usage Today s growing shift towards distributed compositional analyses evinces the applicability of GL theory and the contributions to this volume presented at three international workshops GL 2003 GL 2005 and GL 2007 address the relationship between compositionality in language and the mechanisms of selection in grammar that are necessary to maintain this property The core unresolved issues in compositionality relating to the interpretation of context and the mechanisms of selection are treated from varying perspectives within GL theory including its basic theoretical mechanisms and its analytical viewpoint on linguistic phenomena *Instruction Grammar* Simon Kasper, 2015-07-24 Bringing together evidence from natural and social sciences the work introduces the non reductionist Instruction Grammar programme Viewed from within the practicalities of the lifeworld utterances are described as instructions to simulate perceptions and attributions for action The approach provides solutions to long standing philosophical problems of cognitive grammar theories and traditionally puzzling syntactic phenomena Nouns and the Morphosyntax / Semantics Interface Laure Gardelle, Elise Mignot, Julie Neveux, 2024-03-21 This edited book seeks to bridge a gap in the existing literature on nouns by exploring the exact relationship between their formal and semantic characteristics The introductory chapter offers a thorough state of the art on the morphosyntactic and semantic angles in definitions of nouns provides evidence of misalignments between morphosyntactic and semantic features and argues that a multi criterial angle is in fact inherent in the definition of the class of nouns The following chapters bring together a representative cross section of international level research on the morphosyntax semantics interface for nouns covering a wide variety of languages from French based creoles German and Japanese to English French Italian Russian and Uzbek The focus of the volume is to take a special focus on the

currently underestimated dynamic interplay between morphosyntax and semantics at both language and discourse levels It will be of interest primarily to academics specialists of nouns as well as anyone interested in the interplay between morphology syntax and semantics and graduate students in areas such as syntax semantics morphology theoretical linguistics and discourse analysis **Semantics** Claudia Maienborn,Klaus von Heusinger,Paul Portner,2011 Semantics - Lexical Structures and Adjectives Claudia Maienborn,Klaus von Heusinger,Paul Portner,2019-02-19 Discover vital research on the lexical and cognitive meanings of words In this exciting book from a team of world class researchers in depth articles explain a wide range of topics including thematic roles sense relation ambiguity and comparison The authors focus on the cognitive and conceptual structure of words and their meaning extensions such as coercion metaphors and metonymies The book features highly cited material available in paperback for the first time since its publication and is an essential starting point for anyone interested in lexical semantics especially where it meets other cognitive and conceptual research
