Summer Thunder Alan B. Gibson, 2023-03-06 A small beach town in California a woman who doesn't believe in magic and the man who is about to prove her wrong Lily doesn't need to believe to make a living The fairy figurines she makes draw in customers who come to the Boardwalk to catch a glimpse of magic When the reigning kite surfing world champion wanders into her store Lily has no idea that her life is about to get turned upside down Theos seems an unlikely customer for a fairy figurine but when he buys one he takes on a second mission to convince Lily that magic is real Theos is more than a handsome charismatic athlete He's also the crown prince of a fairy kingdom The competition Theos came to Myers Beach to take part in is disrupted by his father's news of an act of revenge with far reaching consequences The King tasks Theos with replacing the contaminated fairy dust their people need to survive His monumental task means sourcing the nine elements that make the dust before the illness sweeping through the fairies takes the ultimate toll The good luck pendant Lily gives Theos sets in motion a series of magical events that bring them together Can the woman who doesn't believe in fairies be the answer to the fairies dilemma What fate awaits the prince and the shopkeeper if they try

The Changing Mile Revisited Raymond M. Turner, Robert H. Webb, Janice Emily Bowers, James Rodney Hastings, 2021-10-19 The Changing Mile originally published in 1965 was a benchmark in ecological studies demonstrating the prevalence of change in a seemingly changeless place Photographs made throughout the Sonoran Desert region in the late 1800s and early 1900s were juxtaposed with photographs of the same locations taken many decades later The nearly one hundred pairs of images revealed that climate has played a strong role in initiating many changes in the region This new book updates the classic by adding recent photographs to the original pairs providing another three decades of data and showing even more clearly the extent of change across the landscape During these same three decades abundant information about climatic variability land use and plant ecology has accumulated making it possible to determine causes of change with more confidence Using nearly two hundred additional triplicate sets of unpublished photographs The Changing Mile Revisited utilizes repeat photographs selected from almost three hundred stations located in southern Arizona in the Pinacate region of Mexico and along the coast of the Gulf of California Coarse photogrammetric analysis of this enlarged photographic set shows the varied response of the region's major plant species to the forces of change The images show vegetation across the entire region at sites ranging in elevation from sea level to a mile above sea level Some sites are truly arid while others

are located above the desert in grassland and woodland Common names are used for most plants and animals with Latin equivalents in endnotes to make the book more accessible to non technical readers The original Changing Mile was based upon a unique set of data that allowed the authors to evaluate the extent and magnitude of vegetation change in a large geographic region By extending the original landmark study The Changing Mile Revisited will remain an indispensable reference for all concerned with the fragile desert environment
