Summulae De Dialectica:

Summulae de Dialectica Jean Buridan, Gyula Klima, 2001 This volume is the first annotated translation in any language of the entire text of the *Summulae de dialectica* by the Parisian master of arts John Buridan 1300 1358 One of the most influential works in the history of late medieval philosophy the *Summulae* is Buridan's systematic exposition of his nominalist philosophy of logic Buridan's doctrine spread rapidly and for some two hundred years was dominant at many European universities His work is of increasing interest today not only to historians of medieval philosophy but also to modern philosophers several of whom find in Buridan's ideas important clues to problems of contemporary philosophy Gyula Klima provides a substantial introduction to Buridan's life and work and discusses his place in the history of logic Through extensive notes Klima assists philosopher and medievalist alike to read Buridan with understanding and insight Those with a philosophical interest in the relations among the structures of language thought and reality will find much to ponder in the *Summulae*
