Central and Eastern Europe aims to explore the crucial role of green innovation in guiding organisations towards sustainable

development amidst contemporary environmental challenges. It comprehensively examines the concept of the green economy, highlighting its essential features and its significance in promoting organisational sustainability. The study delves into the global state of green economy development, analysing trends in renewable energy, circular economy practices, and green technology innovations. Additionally, it investigates the role of international organisations in supporting the green economy and its impact on global trade and business opportunities. The monograph also addresses strategic planning processes that enable enterprises to integrate sustainability goals into their business strategies, with a focus on social and environmental aspects. It evaluates recycling as a central component of the circular economy, considering its economic and environmental impacts, and underscores the importance of green leadership in fostering a sustainable organisational culture through ethical decision making and environmental considerations. The book will cater to a diverse audience, including professionals, researchers, policymakers, and business leaders committed to steering organisations towards sustainable development. It serves business executives and managers looking to integrate eco-conscious strategies within their organisations, researchers and academics in environmental science and business management, policymakers involved in crafting environmental policies, and environmental advocates seeking practical approaches to advance green initiatives. The content is particularly pertinent to professionals in the European Union and Central and Eastern European countries, with specific insights and case studies from Poland, Estonia, and Ukraine.

Textile Industry and the SDGs José Fernando Gallego-Nicholls, Agustín Carrilero-Castillo, 2024-08-20. This book offers an exploration of the textile industry and their relationship to the Sustainable Development Goals (SDGs), catering specifically to academic researchers and providing a roadmap for aligning textile research with the SDGs. It covers a wide range of topics, starting with an overview of the SDGs and their relevance to the textile industry. It examines the environmental footprint of textiles, including issues related to raw material sourcing, manufacturing processes, and waste management. Additionally, it explores the social and economic aspects of textiles, such as labor conditions, fair trade, and responsible consumption. One of the main focuses of this book is the role of innovation and technology in advancing sustainable textiles. It discusses emerging materials and technologies that promote circularity, reduce environmental harm, and enhance social well-being. Furthermore, it explores the potential of digitalization, artificial intelligence, and data analytics in optimizing textile production, distribution, and consumption patterns. This book also addresses the challenges and opportunities associated with sustainable textile supply chains. It analyzes the complexities of global value chains, the need for transparency and traceability, and the importance of collaboration among stakeholders. Furthermore, it highlights strategies for promoting sustainable fashion, encouraging responsible consumption, and fostering circular business models. By delving into these topics, this book aims to solve several key problems faced by academic researchers in the field of textiles and sustainability. It provides a holistic understanding of the SDGs and their integration into textile research, helping researchers align their work with broader sustainability objectives. It offers insights into the

latest innovations and technologies enabling researchers to explore cutting edge solutions for sustainable textiles Additionally it presents case studies and best practices from industry leaders inspiring researchers to undertake impactful research and contribute to positive change This book is intended for academic researchers as well as practitioners specializing in textiles sustainability and related fields It serves as a valuable resource for professors postgraduate students and professionals seeking to deepen their knowledge of the interplay between textiles and the SDGs It encourages critical thinking fosters interdisciplinary collaboration and equips researchers with the tools and insights necessary to drive sustainable transformations within the textile industry and beyond
