Tall Buildings--2000 and Beyond Lynn S. Beedle, Dolores B. Rice, 1990. Manhattan Skyscrapers Eric Nash, 1999-08. The city of New York is the city of skyscrapers. Every first-time visitor to Manhattan experiences the awe of gazing up at the soaring stone, steel, and glass towers of Wall Street or Midtown and wonders how those structures came to be built. Manhattan Skyscrapers answers the question by presenting the 75 most significant tall buildings that make up the city's famous skyline. From Louis Sullivan's Bayard Condict Building of 1898 on Bleeker Street to the Conde Nast tower currently rising above Times Square, Manhattan Skyscrapers lavishly presents over a hundred years of New York's most interesting and important tall buildings. Author Eric P. Nash profiles familiar skyscrapers such as the Woolworth Building, the Empire State Building, the Chrysler Building, the World Trade Towers, the AT&T Building, and the United Nations Secretariat Building. Also included are quotes from the buildings' architects and the architectural critics of the time. Each skyscraper is illustrated with full-page color photographs by noted photographer Norman McGrath, as well as architectural drawings and plans, archival images of the original interiors, postcards, and other ephemera. Manhattan Skyscrapers is essential reading or an ideal gift for anyone interested in the buildings that make New York the ultimate skyscraper city.
