Bilstein, 2008-12-01 From 1918 to 1929 American aviation progressed through the pioneering era establishing the pattern of  
its impact on national security commerce and industry communication travel geography and international relations In  
America as well as on a global basis society experienced a dramatic transformation from a two dimensional world to a three  
dimensional one By 1929 aviation was poised at the threshold of a new epoch Covering both military and civil aviation trends  
Roger Bilstein s study highlights these developments explaining how the pattern of aviation activities in the 1920s is  
reflected through succeeding decades At the same time the author discusses the social economic and political ramifications  
of this robust new technology Aviation histories usually pay little attention to aeronautical images as an aspect of popular  
culture Thoughtful observers of the 1920s such as Stuart Chase and Heywood Broun considered aircraft to be an  
encouraging example of the new technology workmanlike efficient and graceful perhaps representing a new spirit of
