## **The Choice of Law Process:**

**The Encyclopedia of Public Choice** Charles Rowley, Friedrich Schneider, 2004-07-06 The Encyclopedia provides a detailed and comprehensive account of the subject known as public choice. However, the title would not convey sufficiently the breadth of the Encyclopedia's contents, which can be summarized better as the fruitful interchange of economics, political science, and moral philosophy on the basis of an image of man as a purposive and responsible actor who pursues his own objectives as efficiently as possible. This fruitful interchange between the fields outlined above existed during the late eighteenth century during the brief period of the Scottish Enlightenment when such great scholars as David Hume, Adam Ferguson, and Adam Smith contributed to all these fields and more. However, as intellectual specialization gradually replaced broad-based scholarship from the nineteenth century onwards, it became increasingly rare to find a scholar making major contributions to more than one. Once Alfred Marshall defined economics in neoclassical terms as a narrow positive discipline, the link between economics, political science, and moral philosophy was all but severed, and economists redefined their role into that of the humble dentist providing technical economic information as inputs to improve the performance of impartial, benevolent, and omniscient governments in their attempts to promote the public interest. This indeed was the dominant view within an economics profession that had become besotted by the economics of John Maynard Keynes and Paul Samuelson immediately following the end of the Second World War.

*Choice of Law* Dean Symeon C. Symeonides, 2016-04-15 *Choice of Law* provides an in-depth, sophisticated coverage of the choice of law part: Conflicts Law or Private International Law in torts, products liability, contracts, forum selection, and arbitration clauses; insurance statutes of limitation; domestic relations; property; marital property and successions. It also covers the constitutional framework and conflicts between federal law and foreign law.

**The Choice-of-law Process** David Farquhar Cavers, 1965

**The Foundation of Choice of Law** Sagi Pe'eri, 2018 This book focuses on the subject of choice of law as a whole and provides an analysis of its various rules, principles, doctrines, and concepts. It offers a conceptual account of choice of law called choice equality foundation (CEF), which aims to flesh out the normative basis of the subject. The author reveals that despite the multiplicity of titles and labels within the myriad choice of law rules and practices of the U.S., Canadian, European, Australian, and other systems, many of them effectively confirm and crystallize CEF's vision of the subject. This alignment signifies the necessarily intimate relationship between theory and practice by which the normative underpinnings of CEF are deeply embedded and reflected in actual practical reality. Among other things, this book provides a justification of the nature and limits of such popular principles as party autonomy, most significant relationship, and closest connection. It also discusses such topics as the actual operation of public policy doctrine in domestic courts and the relation between the notion of international human rights and international commercial dealings, and makes some suggestions about the ability of traditional rules to cope with the advancing challenges of the digital age and the Internet.

Cavers,1965      **Private International Law** Symeon C. Symeonides,2021-11-08 This book compares the two golden ages of private international law PIL the first is the era of Story and Savigny in the nineteenth century while the second comprises the last fifty years The period between 1970 and 2020 has been one of rapid changes and dense legislative responses exemplified by the adoption of over one hundred national PIL codifications and almost as many international or regional conventions and regulations These instruments provide a rich source for this book s incisive and instructive comparisons and a fertile ground for a reliable assessment of the progress of PIL as a discipline This book skillfully uncovers and meticulously documents the gradual and largely unnoticed transition of PIL from the idealism of the nineteenth century to the pragmatic eclecticism and pluralism of the twenty first century      *The Choice-of-law Process* David Farquhar Cavers,University of Michigan.
