Ritumban,Ari Bagus Panuntun,2024-01-10 This is an open access book The Critical Island Studies Consortium CIS was born in 2019 in Manila with the theme Critical Island Studies The Islandic Archipelago and Oceanic The CIS consortium aims at developing a new planetary perspective from which to invent an image of the environment and create a new sense of nature with which to seek environmental justice This conference in Yogyakarta is composed of two related yet autonomous sections one is hosted by Universitas Sanata Dharma USD and the other by Universitas Gadjah Mada UGM With USD and UGM taking the lead CIS 2023 continues to carve out the vision of a new more sustainable future for our planet Climate Change Adaptation in the Built Environment Chamindi Malalgoda,Dilanthi Amaratunga,Richard Haigh,Shavindree Nissanka,Nishara Fernando,Ruben Paul Borg,Mo Hamza,2025-05-02 Global climate change is one of the greatest environmental threats facing humanity and it is affecting every country on every continent Recent evidence confirms a close liaison between climate change induced hazards and the built environment as the built environment demonstrates a high fragility and vulnerability to hazardous situations The impact of climate change is particularly pertinent to the built environment given the life expectancy of buildings and the fact that it is essential to adapt the existing built environment to deal with a climate that may be significantly different from that in which it evolved Coastal regions are highly vulnerable to climate change because in addition to changes in temperature precipitation and more frequent flooding they will be affected by rising sea levels wave heights and accelerated coastal erosion The built environment exerts considerable influence over coastal communities local climate and environment Coastal areas also tend

to be highly populated with many vulnerable urban centres located near the coastal belt In addressing such challenges it is important to better understand the impacts of climate change on the built environment and to develop tangible climate adaptation measures for the built environment The Impact of Disasters on Agriculture and Food Security 2023 Food and Agriculture Organization of the United Nations,2023-10-13 Disasters are resulting in unprecedented levels of destruction across the world These shocks and disruptions affect the functioning and sustainability of agricultural production and threaten the livelihoods of millions of people reliant on agrifood systems Reducing the impact of disasters in agriculture requires a better understanding of the extent to which these events produce negative impacts in agriculture and necessitates an investigation into the underlying risks that make agriculture vulnerable to the effects of disasters The FAO flagship report on The Impact of Disasters on Agriculture and Food Security provides a timely and comprehensive overview of how disasters are affecting agriculture and food security around the world Building on previous work of the FAO on this topic the report estimates losses caused by disasters on agricultural production over the past three decades and delves into the diverse threats and impacts affecting the crops livestock forestry and fisheries and aquaculture subsectors It analyzes the complex interplay of underlying risks such as climate change pandemics epidemics and armed conflicts and how they drive disaster risk in agriculture and agrifood systems at large The report provides examples of actions and strategies for investing in resilience and proactively addressing risks in agriculture It demonstrates ways to mainstream disaster risk into agricultural practices and policies and calls for a deeper understanding of the context in which these solutions are implemented
