Playing Software Miguel Sicart, 2023-02-14 The play element at the heart of our interactions with computers and how it drives the best and the worst manifestations of the information age Whether we interact with video games or spreadsheets or social media playing with software shapes every facet of our lives In *Playing Software* Miguel Sicart delves into why we play with computers how that play shapes culture and society and the threat posed by malefactors using play to weaponize everything from conspiracy theories to extractive capitalism Starting from the controversial idea that software is an essential agent in the information age Sicart considers our culture in general and our way of thinking about and creating digital technology in particular as a consequence of interacting with software's agency through play As Sicart shows playing shapes software

agency In turn software shapes our agency as we adapt and relate to it through play That play drives the creation of new cultural social and political forms Sicart also reveals the role of make believe in driving our playful engagement with the digital sphere From there he discusses the cybernetic theory of digital play and what we can learn from combining it with the idea that playfulness can mean pleasurable interaction with human and nonhuman agents inside the boundaries of a computational system Finally he critiques the instrumentalization of play as a tool wielded by platform capitalism
