The Changing World Britains Changing Countryside:

The Changing World of Farming in Brexit UK Matt Lobley, Michael Winter, Rebecca Wheeler, 2018-11-22 The 2016 referendum resulted in a vote for the United Kingdom to withdraw from the European Union This has led to frenzied political debate across the whole spectrum of policy and agriculture is no exception For the first time in a generation the future of agriculture is unclear and unfettered by the constraints and incrementalism of the Common Agricultural Policy This book makes an empirical contribution to the Brexit debate bringing a social dimension to agri Brexit and sustainable agriculture discourses Understanding the social in the context of farmers is vital to developing a way forward on food security and agricultural sustainability Farmers are the recipients of the market and policy signals that link to global uncertainties and challenges This book is a commitment to understanding farmers as occupiers and managers of land Chapters in this book explore farmers own aspirations and knowledge about patterns of land use and production which underpin discussions around the environment and sustainability There is a deficit in understanding what kind of agricultural industry we now have following years of restructuring and repositioning This book is an attempt to address that deficit and will appeal to students and researchers exploring agriculture food politics and rural sociology

Canals in a Changing Britain Jules P. Gehrke, 2024-12-15 This book assesses canals as a major technological system re shaping Britons relationship with their landscape and environment between 1760 and 1968 and argues this 200 year arc of historical experience is essential to understanding canals as sites of recreation leisure heritage and experience of the natural environment

The Changing American Countryside Emery N. Castle, 1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers *The Changing American Countryside* a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life

Contesting

Rurality Michael Woods, 2017-05-15 Rural issues have gained national prominence in Britain in recent years The future of hunting the Foot and Mouth outbreak farm income and agricultural reform and housing development have all claimed political and media attention promoted by a vocal rural lobby and headline grabbing protests and demonstrations Combining detailed empirical research and case studies with theoretically informed critical analysis this book provides an overview of the contemporary politics of the British countryside It explores how and why rural issues have suddenly achieved such political prominence by examining the changing politics and governance of rural Britain from the local to the national scale over the past century It investigates the social economic and institutional restructuring of rural communities and argues that we are witnessing not so much a rural politics but a politics of the rural in which the definition and representation of rurality itself has become the key focus of conflict

The Past in Contemporary Society: Then, Now Peter Fowler, 2002-09-11 Changes or innovations which threaten our heritage arouse great hostility in those who want to preserve the past in its entirety The heritage has become a commodity a device to sell everything from biscuits to country houses Fowler skilfully examines the present relationship between the past and the present analysing the manner in which we mould and interpret the past to fit our current needs He assesses the influence of our heritage in the last decade of the 20th century and with a wide range of examples judges the consequences of the increasing pressures of the heritage industry As well as a diagnosis of where the past is being misused he provides prescriptions for responsible development and a thoughtful interpretation of a common past As well as addressing the needs of the professional involved in the heritage industry he also considers the consumer all those who visit museums enjoy a historic site or an art exhibition or who simply dislike the hijacking of our common heritage by commercial or vested interests
