The Christian Church As Social Process:

The Christian Church as Social Process Norman Pittenger, 2017-05-03 One of the most important movements in recent philosophy and theology is the process thought associated with the name Alfred North Whitehead the distinguished Cambridge thinker who died in 1947 In North America this conceptuality is increasingly being used by Christian theologians for the restatement of Christian faith worship and practice The present book is the first attempt by a British theologian to apply this kind of thinking to the interpretation of the church itself In an earlier book *The Last Things in a Process Perspective* Dr Pittenger interpreted death judgement heaven and hell in this new way Now he turns to the church its nature its purpose its ministry its concern for the world its interest in social issues and seeks to show how the Christian fellowship is a social process in which the Love which is God and which was incarnate in Jesus is continuing to work in the affairs of men through the community which took to Jesus as its Lord and Master Process thought is at last receiving its due recognition in Britain In this book the reader will find an application of that conceptuality to the institution which all too often has been looked upon as wooden and static The contention of the author is that the church rightly understood is a dynamic living vital and forward looking fellowship He believes that acceptance of this truth will revitalize the discipleship of Christians and will attract and interest those who hitherto have dismissed the church as an outworn and dead establishment **The Christian**

Church as Social Process William Norman Pittenger, 1971 **Social Process** Charles Horton Cooley, 1920 **The Making of American Liberal Theology** Gary J. Dorrien, 2006-01-01 In this first of three volumes Dorrien identifies the indigenous roots of American liberal theology and demonstrates a wider longer running tradition than has been thought The tradition took shape in the nineteenth century motivated by a desire to map a modernist third way between orthodoxy and rationalistic deism atheism It is defined by its openness to modern intellectual inquiry its commitment to the authority of individual reason and experience its conception of Christianity as an ethical way of life and its commitment to make Christianity credible and socially relevant to modern people Dorrien takes a narrative approach and provides a biographical reading of important religious thinkers of the time including William E Channing Ralph Waldo Emerson Horace Bushnell Henry Ward Beecher Elizabeth Cady Stanton and Charles Briggs Dorrien notes that although liberal theology moved into elite academic institutions its conceptual foundations were laid in the pulpit rather than the classroom *The New Yoder*

Peter Dula, Chris K. Huebner, 2010-01-01 The work of John Howard Yoder has become increasingly influential in recent years Moreover it is gaining influence in some surprising places No longer restricted to the world of theological ethicists and Mennonites Yoder has been discovered as a refreshing voice by scholars working in many other fields For thirty five years Yoder was known primarily as an articulate defender of Christian pacifism against a theological ethics guild dominated by the Troeltschian assumptions reflected in the work of Walter Rauschenbusch and Reinhold and Richard Niebuhr But in the last decade there has been a clearly identifiable shift in direction A new generation of scholars has begun reading Yoder

alongside figures most often associated with post structuralism neo Nietzscheanism and post colonialism resulting in original and productive new readings of his work At the same time scholars from outside of theology and ethics departments indeed outside of Christianity itself like Romand Coles and Daniel Boyarin have discovered in Yoder a significant conversation partner for their own work This volume collects some of the best of those essays in hope of encouraging more such work from readers of Yoder and in hopes of attracting others to his important work

Social Process in Hawaii ,1961 **The Christian Century** ,1930 *The Congregationalist and Herald of Gospel Liberty* ,1930 **International Journal of Religious Education** ,1924 *Our Economic System* Harry Gordon Hayes,1928 *The Shape of Participation* L. Roger Owens,2010-03-01 *The Shape of Participation* is a work of constructive theology addressed to theologians seminarians and thoughtful pastors Owens engages and deepens recent popular discussions of church practices by approaching practices from the church Fathers understanding of the church s participation in God Through a wide ranging engagement with theologians both ancient and contemporary including Cyril of Alexandria Maximus the Confessor Dietrich Bonhoeffer and Herbert McCabe Owens argues that the embodied practices of the church are the church s participation in the life of God making the church Jesus own continued peaceable embodiment in and for the world This book is for theologians pastors and anyone who wants a deeper understanding of how the visible presence of God s church is extraordinarily good news in a violent world

Hermeneutics and Empirical Research in Practical Theology Chris Hermans,Mary Moore,2021-09-20 There is a growing consensus among scholars in different countries about the object of practical theology Hans van der Ven has contributed much to this consensus through his writings on the foundations of practical theology the empirical paradigm within practical theology and specific subdisciplines within practical theology especially religious education moral education church development and ministry At the center of this growing consensus is an understanding of the independent hermeneutical role of religious experiences and practices of people in the process of theological theory building If contemporary religious experiences and practices have a critical role with regard to religious tradition and the ministry of this tradition then practical theology cannot just be a form of applied theology The contributors of this volume focus on this hermeneutical core foundations of practical theology and on empirical research as a research method within practical theology in the work of Van der Ven
