The Dancing Mouse: A Study in Animal Behavior Robert Mearns Yerkes, 2022-09-04 In The Dancing Mouse A Study in Animal Behavior Robert Mearns Yerkes creates a fascinating mosaic of scientific inquiry into the capabilities and idiosyncrasies of the *Mus musculus* or house mouse Empirical in its approach and remarkably ahead of its time Yerkes's work delves into the methodology of behavior study with precision and a narrative flair seldom found in early 20th century scientific literature The book navigates through a series of meticulously conducted experiments making significant contributions to the fields of comparative psychology and ethology Yerkes's prose is lucid and punctuated by insights that contextualize the dancing mouse's behaviors within broader biological and evolutionary frameworks reflecting a literary era when scientific exposition was as much art as it was academic rigor Robert Mearns Yerkes was a seminal figure in American psychology particularly known for his groundbreaking work in primatology and psychometrics The impetus for The Dancing Mouse stemmed from Yerkes's profound interest in intelligence and learning across species leading him to formulate pioneering theories on social behavior dynamics and neurological processes This text emblematic of his relentless curiosity and intellectual prowess stands as an enduring illustration of his

contributions to behavioral science and his quest to unveil the underlying mechanisms of animal cognition For scholars and enthusiasts of animal behavior and the history of psychology Yerkes s *The Dancing Mouse* is essential reading It offers readers a chance to observe the origins of contemporary understandings of behavior filtered through the lens of a master observer and analyst The book provides not only an exceptional case study but also an illustrative example of the scientific method applied with diligence and creativity In republished form it remains a touchstone within the canon of psychological literature urging both respect for its historical significance and a continued appreciation for the mysteries of animal behavior it endeavored to decode

The Animal Mind Margaret Floy Washburn, 1913 Excerpt from book CHAPTER II The Evidence Of Mind 6 Inferring Mind from Behavior In the last chapter we saw that some recent writers upon animal behavior and its interpretation while refusing to admit the presence of consciousness in all forms of animal life yet hold that it can be proved to exist in certain forms The latter it is maintained display certain peculiarities of behavior that may be regarded as proofs of a psychic accompaniment Into the nature of these proofs we may now inquire To begin with can it be said that when an animal makes a movement in response to a certain stimulus there is an accompanying consciousness of the stimulus and that when it fails to move there is no consciousness Is response to stimulation evidence of consciousness In the case of man we know that absence of visible response does not prove that the stimulus has not been sensed while it is probable that some effect upon motor channels always occurs when consciousness accompanies stimulation the effect may not be apparent to an outside observer On the other hand if movement in response to the impact of a physical force is evidence of consciousness then the ball which falls under the influence of gravity and rebounds on striking the floor is conscious Nor is the case improved if we point out that the movements which animals make in response to stimulation are not the equivalent in energy of the stimulus applied but involve the setting free of energy stored in the animal as well True when a microscopic animal meets an obstacle in its swimming and darts backward the movement is not a mere rebound it implies energy contributed by the animal s own body But just so an explosion of gunpowder is not the equivalent in energy of the heat of the match the stimulus Similarly it is Annotation Published April 2014
