Triple Knowledge An Exposition Of Volume 2:

Unity of Knowledge (in Transdisciplinary Research for Sustainability) - Volume II Gertrude Hirsch Hardon, 2008-12-31 Unity of Knowledge in Transdisciplinary Research for Sustainable Development theme is a component of Encyclopedia of Social Sciences and Humanities in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty Encyclopedias Today there is a social need for a comprehensive unity of knowledge that would provide orientation and ensure action in the context of the complex problems of modern civilization Based on an intellectual need for unity of knowledge different concepts of unity of knowledge have emerged in the course of the history of ideas The intellectual need for unity can be directed at the world science action or the individual It can involve the quest for the unity of the world based on a principle that is immanent in it the unity of science as a theoretical methodical or epistemological unity the unity of action as a correlation of scientific pragmatic and moral knowledge or finally unity as the educational task of the individual The concepts associated with unity of knowledge can go in two directions The first assumes that there is a unity existing in the world that can be perceived by man It is thought of as an order of being i e an ontological unity of the plurality of phenomena that consist in their common nature The other direction is based on the assumption that unity is a construction of a subject based on its cognitive principles and structures Thus it is not something that can be discovered as an existing objective order and is instead subjective These two volumes present some aspects of Unity of Knowledge in Transdisciplinary Research for Sustainable Development in three parts The purpose of the first part is to trace back the core ideas in transdisciplinary thinking in the history of western philosophy and science to locate socially the concerns of transdisciplinary research and to give an account of the development of transdisciplinary research The second group of chapters deals with methodological and management problems related to transdisciplinary research with regard to problem identification and structuring of research questions with knowledge integration in problem investigation as well as with evaluation An outline of the institutional measures and transformations to enable and support transdisciplinary research is given in the third part Institutional strategies build on organizational arrangements and links across academic institutions in education and research on networks between science and society for joint knowledge production in temporally limited settings of research programs or projects but they also set up new institutions such as centers for advanced studies national offices agencies and networks These two volumes are aimed at a wide spectrum of audiences University and College Students Educators Research Personnel and all those concerned with sustainable development *Reports on the Paris universal exhibition, 1867.
