## **Undermining Development:**

**Undermining Development** Sarah Michael, 2004 Why haven't development programs sponsored by local NGOs been more effective in Africa In this careful study of NGOs in three African countries Zimbabwe Tanzania and Senegal Sarah Michael exposes reasons why successful well run and powerful development programs are infrequent in Africa Michael's argument focuses on issues of power NGOs in Africa do not command the financial resources employ the professional staff or have the same access to donors that NGOs in other parts of the world enjoy Main topics covered in this probing book include What does a powerful NGO look like How does power affect sustainable development What circumstances prevent local NGOs in Africa from wielding power How can African NGOs remedy their absence of power What relationship with donors and international NGOs should be cultivated This book will interest readers concerned with issues pertaining to the organization mission and implementation of development NGOs in Africa and beyond **Proceedings** Christopher Mark, Robert J. Tuchman, 2007 **Financialisation, Capital Accumulation and Economic Development in Nigeria** Ejike Udeogu, 2018-11-30 The inadequacies of many past studies that have tried to highlight the causes of the persistent underdevelopment in developing countries such as Nigeria have been noted to derive mainly from the focus and in some cases the methodologies adopted by the researchers It has been suggested that although many researchers recognize the inability to reproduce sufficient profit as undermining the capitalist accumulation process and as a result the development of an economy they have nevertheless often tended to ignore the importance of the political economic arrangement and historical factors in the formation of expectations about the rate of profit Indeed in some cases they have failed to provide a substantive account of these critical variables This book highlights how the inherent contradictions of the contemporary political economic arrangement and some historical factors undermined the peculiar capital accumulation processes in Nigeria which in turn has slowed economic development in the country This book contributes to the field of Nigeria studies by filling gaps that exist in both theoretical and empirical literature on growth and development in the country deviating from the orthodox approach of analysing the nation's problems purely based on the factors internal to the country and by imposing ready made theoretical logics on history Rather it studies Nigeria's problems in juxtaposition with the world system and imposes historical evidence on theoretical logics This book represents a good resource for both undergraduate and postgraduate courses on area studies Researchers and policy makers will also find it useful as a reference Journal of Development Alternatives and Area Studies ,2007 A Development Guide ,1982 **The Valley Form and Its Development ; Base-level and Its Varieties** Clyde A.
