Understanding Buildings, 1984 This book was written mainly for aspiring architects and civil engineers and covers almost all types of building systems thoroughly It is very detailed and has separate chapters for important topics such as structure climate services lighting acoustics fire safety etc Although the author largely stays away from mathematics he is always clear and concise in dealing even with complex analytical problems As an example I would give his excellent treatment of two and three hinged portals and the fascinating parallels he draws between the engineering ideal of arches and the different types of portals He covers all major construction techniques from timber platform frame construction generally of houses to more complex forms such as the hyperbolic paraboloid opposed double curvature and the esoteric hyperboloid of revolution the opposed double curvature architecture almost always in concrete common in power station cooling towers His writing on accessory systems such as heating air conditioning ventilation and fire detection and prevention are both introductory and comprehensive In all areas from structure to systems he is careful to explain real world rationale in an approachable format that is both thorough and easy to understand

Twenty Buildings Every Architect Should Understand Simon Unwin, 2010-02-25 Have you ever wondered how the ideas behind the world's greatest architectural designs came about What process does an architect go through to design buildings which become world renowned for their excellence This book reveals the secrets behind these buildings He asks you to read the building and understand its starting point by analyzing its final form Through the gradual revelations made by an understanding of the thinking behind the form you learn a unique methodology which can be used every time you look at any building

Twenty-Five+ Buildings Every Architect Should Understand Simon Unwin, 2023-11-03 The underlying theme of *Twenty Five Buildings Every Architect Should Understand* is the relationship of architecture to the human being how it frames our lives and orchestrates our experience how it can help us make sense of the world and contribute to our sense of identity and place Exploring these dimensions through a wide range of case studies that illustrate the rich diversity of twentieth and twenty first century architecture this book is essential reading for every architect With the addition of numerous shorter analyses this new edition covers an even greater range of architectural ideas providing students and architects with further inspiration for exploration in their own design work Architects live by ideas But where do they come from And how do they shape buildings There is no one right way to do architecture This book illustrates many Its aim is to explore the rich diversity of architectural creativity by analysing a wide range of examples to extract the ideas behind them *Twenty Five Buildings Every Architect Should Understand* is a companion to Simon Unwin's

Analysing Architecture the Universal Language of Place Making most recent edition 2021 and part of the trilogy which also includes his Exercises in Architecture Learning to Think as an Architect second edition 2022 Together the three books offer an introduction to the workings of architecture providing for the three aspects of learning theory examples and practice Twenty Five Buildings focusses on analysing examples using the methodology offered by Analysing Architecture which operates primarily through the medium of drawing An underlying theme of Twenty Five Buildings Every Architect Should Understand is the relationship of architecture to the human being how it frames our lives and orchestrates our experiences how it can help us give form to the world and contributes to our senses of identity and place Exploring these dimensions through case studies that illustrate the rich diversity of twentieth and twenty first century architecture this book is essential reading and hopefully an inspiration for every architect In this new edition supplementary analysis and discussion has been added to each of the twenty five case studies drawing attention to their influences from and on other architects A number of extra shorter analyses have been included too following the practice of presenting extra small dishes interspersed among main courses in high end restaurants These additional short analyses account for the sign after Twenty Five in the title of this edition and double the number of buildings analysed to around fifty

Practical Building Conservation David Odgers, Alison Henry, 2012 Stone considers the wide variety of historical uses from simple masonry walling through to elaborate carving and decoration The book considers why stone decays or fails and how to assess and understand the causes before concentrating on the practical methods of treatment repair and maintenance

Understanding Tall Buildings Kheir Al-Kodmany, 2017-02-17 In recent years the rapid pace of tall building construction has fostered a certain kind of placelessness with many new tall buildings being built out of scale context and place By analyzing hundreds of tall buildings and by providing hundreds of visuals that inspire stimulate and engage Understanding Tall Buildings contends that well designed tall buildings can rejuvenate cities ignite economic activity support social life and boost city pride Although this book does not claim to possess all the solutions it does propose specific tall building design guidelines that may help to promote placemaking Through this work it is the author's hope that ill conceived developments will become less common in the future and that good placemaking will become the norm not the exception This book is a must read for students and practitioners working to create better tall buildings and better urban environments

Drawing for Understanding Allan T. Adams, 2016 This guidance describes a method of recording historic buildings for the purpose of historical understanding using analytical site drawing and measuring by hand The techniques described here have a long tradition of being used to aid understanding by observation and close contact with building fabric They can be used by all involved in making records of buildings of all types and ages but are particularly useful for vernacular buildings and architectural details which are crucial to the history of a building or site Record drawings are best used alongside other recording techniques such as written reports and photography or to supplement digital survey data They can also be used as a basis for illustrations that disseminate understanding to wider audiences
