Understanding Consumption Experiences Salvia Ann McKechnie,2014

Sugar and Spice Jon Stobart,2016-12-01 Consumers in eighteenth century England were firmly embedded in an expanding world of goods one that incorporated a range of novel foods tobacco chocolate coffee and tea and new supplies of more established commodities including sugar spices and dried fruits Much has been written about the attraction of these goods which went from being novelties or expensive luxuries in the mid seventeenth century to central elements of the British diet a century or so later They have been linked to the rise of Britain as a commercial and imperial power whilst their consumption is seen as transforming many aspects of British society and culture from mealtimes to gender identity Despite this huge significance to ideas of consumer change we know remarkably little about the everyday processes through which groceries were sold bought and consumed In tracing the lines of supply that carried groceries from merchants to consumers Sugar and Spice reveals how changes in retailing and shopping were central to the broader transformation of consumption and consumer practices but also questions established ideas about the motivations underpinning consumer choices It demonstrates the dynamic nature of eighteenth century retailing the importance of advertisements in promoting sales and shaping consumer perceptions and the role of groceries in making shopping an everyday activity At the same time it shows how both retailers and their customers were influenced by the practicalities and pleasures of consumption They were active agents in consumer change shaping their own practices rather than caught up in a single socially inclusive cultural project such as politeness or respectability

Sharing the World Michael Carley,Phillipe Spapens,2017-09-25 This work proposes a framework based on the concept of a fair distribution of environmental space to include the diverse needs of North and South Drawing on research in 38 countries it aims to give an equitable basis for global development in order to achieve sustainable consumption by the year 2050 The environmental space approach seeks to explain the limitations of the global market economy as a tool of development and to give us the means to alter it in order to achieve a genuine quality of life rather than

simple economic growth In addition this book seeks to urge all countries and peoples to consider and evaluate the environmental space approach and to join in a movement towards sustainable production and consumption for the 21st century

Gender, Youth and Culture Anoop Nayak, Mary Jane Kehily, 2013-06-07 The question of how boys become men or how girls become women may seem simple but the answers can be complex This new edition draws upon rich examples from research popular media and global accounts to explore how gender is produced consumed regulated and performed in young lives today
