Cosmological Readings of Contemporary Australian Literature Kathrin Bartha-Mitchell,2023-12-22 This book presents an innovative and imaginative reading of contemporary Australian literature in the context of unprecedented ecological crisis The Australian continent has seen significant rapid changes to its cultures and land use from the impact of British colonial rule yet there is a rich history of Indigenous land ethics and cosmological thought By using the age old idea of cosmos the order of the world to foreground ideas of a good order and chaos reciprocity and more than human agency this book interrogates the Anthropocene in Australia focusing on notions of colonisation farming mining bioethics technology environmental justice and sovereignty It offers cosmological readings of a diverse range of authors Indigenous and non Indigenous as a challenge to the Anthropocene s decline narrative As a result it reactivates cosmos as an ethical vision and a transculturally important counter concept to the Anthropocene Kathrin Bartha Mitchell

argues that the arts can help us envision radical cosmologies of being in and with the planet and to address the very real social and environmental problems of our era This book will be of particular interest to scholars and students of Ecocriticism Environmental Humanities and postcolonial transcultural and Indigenous studies with a primary focus on Australian New Zealand Oceanic and Pacific area studies

The Universal Kabbalah Leonora Leet,2004-09-29 Presents a new understanding of the laws of cosmic manifestation through the sacred geometry of the Sabbath Star diagram Explores three higher levels of consciousness above the four worlds of the classical Kabbalah Reveals the mathematical code of the laws of all cosmic manifestation This landmark work by an innovative modern Kabbalist develops a scientific model for kabbalistic cosmology and soul psychology derived from the kabbalistic diagram of the Tree of Life and the author's own Sabbath Star diagram a configuration of seven Star of David hexagrams This geometric model begins with the four worlds of the classical Kabbalah which bring us to the present time and birthright level of the soul and is then expanded to three higher enclosing worlds or levels of evolving consciousness The Sabbath Star diagram therefore accommodates both the emanationist cosmology of the earlier Zoharic Kabbalah and the future orientation of the later Kabbalah of Isaac Luria The hexagram elements that construct each expansion of the Sabbath Star diagram configure the cosmic stages of each of its worlds The matrix that is produced by these construction elements configures the level of the multi dimensional soul that is correlated with each cosmic world In its final stage this model unites the finite and infinite halves of the Sabbatical world in a way that exemplifies the secret doctrine of the Kabbalah Not only does this work offer a new inclusive model for the Kabbalah but it also provides a basis for complexity theory with its final extrapolation to infinity The universality of this model is further shown by its applicability to such other domains as physics sociology linguistics and human history This universal model encodes the laws of all cosmic manifestation in terms that are particularly coherent with the formulations of the Kabbalah giving a mathematical basis to many aspects of this mystical tradition and providing a new synthesis of science and spirituality for our time that may well write a new chapter to the Kabbalah

The Principle of Moratorism

Cometan,2019-11-25 The Principle of Moratorism is the forty fourth instalment in the Little Blue Book Series and is comprised of the twenty third and twenty fourth discourses of the Duodoxy which is itself the second disquisition of the founding book of Astronism called the Omnidoxy The Little Blue Book Series was created and first published by Cometan himself as a way to simplify and commercialise the immensity of the two million word length of the Omnidoxy into smaller more bite size publications A successful series from its very first published entry the Little Blue Book Series has gone on to become a symbol of Astronist commercial literature and a way for Cometan's words to reach readers of all ages and abilities who remain daunted by the beauty and yet the sheer extensiveness of the Omnidoxy as the longest religious text in history

Peebles,2020-06-02 From Nobel Prize winning physicist P J E Peebles the story of cosmology from Einstein to today Modern cosmology began a century ago with Albert Einstein s general theory of relativity and his notion of a homogenous philosophically satisfying cosmos Cosmology s Century is the story of how generations of scientists built on these thoughts and many new measurements to arrive at a well tested physical theory of the structure and evolution of our expanding universe In this landmark book one of the world s most esteemed theoretical cosmologists offers an unparalleled personal perspective on how the field developed P J E Peebles was at the forefront of many of the greatest discoveries of the past century making fundamental contributions to our understanding of the presence of helium and microwave radiation from the hot big bang the measures of the distribution and motion of ordinary matter and the new kind of dark matter that allows us to make sense of these results Taking readers from the field s beginnings Peebles describes how scientists working in independent directions found themselves converging on a theory of cosmic evolution interesting enough to warrant the rigorous testing it passes so well He explores the major advances some inspired by remarkable insights or perhaps just lucky guesses as well as the wrong turns taken and the roads not explored He shares recollections from major players in this story and provides a rare inside look at how science is really done A monumental work Cosmology s Century also emphasizes where the present theory is incomplete suggesting exciting directions for continuing research
