East Asia is a huge source of friction between China and Japan causing major diplomatic and political difficulties right up to the present. As this book shows however, there is also disagreement within these countries as to how to remember the war which in the case of China began immediately after the war and lasted with varying degrees of intensity until the famous textbook incident of 1982 marked the beginning of a more strongly anti-Japanese position. Based on extensive original research, the book explores how China's remembrance of the war has evolved over time. It not only explores the roles played by the national as well as local state actors in the formation of the Chinese war memory but also pays attention to the individual Chinese people. It considers particular aspects of commemoration in China, explores the corresponding situation in Japan, and discusses the continuing impact on the relationship between the two countries.

War and Remembrance in the Twentieth Century Jay Winter, Emmanuel Sivan, 2000-08-27

How war has been remembered collectively is the central question in this volume. War in the twentieth century is a vivid and traumatic phenomenon which left behind it survivors who engage time and time again in acts of remembrance. This volume, containing essays by outstanding scholars of twentieth-century history, focuses on the issues raised by the shadow of war in this century. The behaviour not of whole societies or of ruling groups alone but of the individuals who do the work of remembrance is discussed by examining the traumatic collective memory resulting from the horrors of the First World War, the Spanish Civil War, the Second World War, and the Algerian War. By studying public forms of remembrance such as museums and exhibitions, literature, and film, the editors have succeeded in bringing together a volume which demonstrates that a popular kind of collective memory is still very much alive.

Commonwealth War Graves Commission, 1926 **Remembering War** J. M. Winter, 2006-01

This is a masterful volume on remembrance and war in the twentieth century. Jay Winter locates the fascination with the subject of memory within a long-term trajectory that focuses on the Great War. Images, languages, and practices that appeared during and after the two world wars focused on the need to acknowledge the victims of war and shaped the ways in which future conflicts were imagined and remembered. At the core of the memory boom is an array of collective meditations on war and the victims of war. Winter says: "The book begins by tracing the origins of contemporary interest in memory, then describes practices of remembrance that have linked history and memory particularly in the first half of the twentieth century. The author also considers theaters of memory: film, television, museums, and war crimes trials in which the past is seen through public representations of memories. The book concludes with reflections on the significance of these practices for the cultural history of the twentieth century as a whole."
