Zoom Away:

Zoom Tim Wynne-Jones, 2009 An adventurous cat goes on a journey to the sea an expedition to the North Pole and a trip to Egypt
Zoom Bob Berman, 2014-06-24 From the speed of light to moving mountains and everything in between Zoom explores how the universe and its objects move If you sit as still as you can in a quiet room you might be able to convince yourself that nothing is moving But air currents are still wafting around you Blood rushes through your veins The atoms in your chair jiggle furiously In fact the planet you are sitting on is whizzing through space thirty five times faster than the speed of sound Natural motion dominates our lives and the intricate mechanics of the world around us In Zoom Bob Berman explores how motion shapes every aspect of the universe literally from the ground up With an entertaining style and a gift for distilling the wondrous Berman spans astronomy geology biology meteorology and the history of science uncovering how clouds stay aloft how the Earth s rotation curves a home run s flight and why a mosquito s familiar whine resembles a telephone s dial tone For readers who love to get smarter without realizing it Zoom bursts with science writing at its best
