Routledge Handbook of Consumer Protection and Behaviour in Energy Markets Tina Soliman Hunter, Marcin Kraśniewski, Jurgita Malinauskaite, Marzena Czarnecka, 2024-09-27 The Routledge Handbook of Consumer Protection and Behaviour in Energy Markets provides a comprehensive study of consumer protection and consumer behaviour in selected jurisdictions worldwide Each chapter is written by experts and provides a contemporary overview of national consumer protection and policy developments in the energy sector Today energy has become an essential factor in ensuring the socio economic development of any country and improving the quality of life of society and is now an essential element of life for everyone The energy market has become a competitive market based on the assumption that generation and sale of energy is not a natural monopoly and that market mechanisms in particular competition between energy companies are the best way to reduce prices and improve customer service The purchase of energy is inextricably linked with its distribution from the producer to the purchaser The book shows that well functioning energy markets need informed and well protected consumers who can benefit from competition and transparent offers They are free to choose the most competitive providers and know their rights with access to effective means of redress Given that the energy market has a specific technical nature the book analyses the energy market within the scope of free market principles with a focus on the protection of the weaker party to the contract the consumer In addition consumers can also play an active part of the clean energy transition

Best Practices in State and Regional Innovation Initiatives National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, Committee on Competing in the 21st Century: Best Practice in State and Regional Innovation Initiatives, 2013-07-04 Most of the policy discussion about stimulating innovation has focused on the federal level This study focuses on the significant activity at the state level with the goal of improving the public s understanding of key policy strategies and exemplary practices Based on a series of workshops and conferences that brought together policymakers along with leaders of industry and academia in a select number of states the study highlights a rich variety of policy initiatives underway at the state and regional level to foster knowledge based growth and employment Perhaps what distinguishes this effort at the state level is most of all the high degree of pragmatism Operating out of

necessity innovation policies at the state level often involve taking advantage of existing resources and recombining them in new ways forging innovative partnerships among universities industry and government organizations growing the skill base and investing in the infrastructure to develop new technologies and new industries Many of these initiatives are being guided by leaders from the private sector and universities The objective of Best Practices in State and Regional Innovation Initiatives Competing in the 21st Century is not to do an empirical review of the inputs and outputs of various state programs Nor is it to evaluate which programs are superior Indeed some of the notable successes such as the Albany nanotechnology cluster represent a leap of leadership investment and sustained commitment that has had remarkable results in an industry that is actively pursued by many countries The study s goal is to illustrate the approaches taken by a variety of highly diverse states as they confront the increasing challenges of global competition for the industries and jobs of today and tomorrow
