Syntax Of Anaphoric Binding:

The Syntax of Anaphoric Binding Mary Dalrymple, 1993-07 Mary Dalrymple provides a theory of the syntax of anaphoric binding couched in the framework of Lexical Functional Grammar Cross linguistically anaphoric elements vary a great deal One finds long and short distance reflexives sometimes within the same language pronominals may require local noncoreference or coreference only with nonsubjects Analyses of the syntax of anaphoric binding which have attempted to fit all languages into the mold of English are inadequate to account for the rich range of syntactic constraints that are attested How then can the cross linguistic regularities exhibited by anaphoric elements be captured while at the same time accounting for the diversity that is found Dalrymple shows that syntactic constraints on anaphoric binding can be expressed in terms of just three grammatical concepts subject predicate and tense These concepts define a set of complex constraints combinations of which interact to predict the wide range of universally available syntactic conditions that anaphoric elements obey Mary Dalrymple is a member of the research staff of the Natural Language Theory and Technology group at the Xerox Palo Alto Research Center

The Derivation of Anaphoric Relations Glyn Hicks, 2009-03-11 The Derivation of Anaphoric Relations resolves a conspicuous problem for Minimalist theory the apparently representational nature of the binding conditions Hicks adduces a broad variety of evidence against the binding conditions applying at LF and builds upon the insights of recent proposals by Hornstein Kayne and Reuland by reducing them to the core narrow syntactic operations specifically Agree and Merge Several novel and independently motivated claims about syntactic features and phases are made not only explaining the previously stipulated roles played by c command reference and locality but furnishing the derivational binding theory with sufficient flexibility to capture some long problematic empirical phenomena These include connectivity effects picture noun reflexives in English and anaphor pronoun non complementarity Specific proposals are also made for extending the derivational approach to accommodate structured crosslinguistic variation in binding with thorough expositions and analyses of the Dutch Norwegian and Icelandic pronominal systems

The Syntax of Past Participles

Verner Egerland, 1996 *NP-Anaphora in Modern Greek* Michael Chiou, 2010-01-08 Anaphora is one of the most fascinating linguistic phenomena as it constitutes a unique and universal property of human language Every single natural language provides linguistic means which facilitate speakers to refer to entities in the world The understanding of the complexity of anaphora and of the problems surrounding it will ameliorate our understanding of the nature of human languages This explains why anaphora constitutes a central research topic in contemporary linguistic science This study examines the phenomenon of NP anaphora with the main focus on modern Greek By maintaining the empirical and theoretical benefits of the classical generative approach to binding in this study we propose a partial pragmatic reduction of the interpretation of NP anaphora in modern Greek in terms of the neo Gricean pragmatic principles of communication The proposed analysis is articulated on the following basis it is argued that the choice of anaphoric expressions and their interpretation by Greek

speakers and addressees respectively is heavily dependent on preference which is regulated by principles of language use and communication. Therefore, by employing a model which is based on the systematic interaction of the neo-Gricean pragmatic principles of communication, we provide a neat and more elegant approach to NP anaphora resolution for modern Greek. In a nutshell, this study offers a quite new perspective into the study of NP anaphora in modern Greek, but it is also a little step towards a better understanding of the phenomenon of anaphora across languages.
