Skyscrapers George H. Douglas, 2004-08-19 This history of skyscrapers examines how these tall buildings affected the cityscape and the people who worked in and visited them Much of the focus is rightly on the architects who had the vision to design and build America's skyscrapers but attention is also given to the steelworkers who built them the financiers who put up the money and the daredevils who attempt to conquer them in some inexplicable pursuit of fame The impact of the skyscraper on popular culture particularly film and literature is also explored

**100 of the World's Tallest Buildings** Antony Wood, 2015-08-28 Upon the release of the 100 of the World's Tallest Buildings the first 100 of the world's tallest buildings will be more than 985 feet 300 meters for the first time This book will showcase many of the new tall builds across Asia and the Middle East in particular Compiled by the CTBUH Council on Tall Buildings and Urban Habitat with insightful introductory essays on key trends in the skyscraper typology a preview of the future and by renowned tall buildings expert Georges Binder on the history of the world's tallest buildings by decade this ambitious and comprehensive text provides in depth descriptions of the buildings design and significance accompanied by stunning images detailed drawings and plans Towering structures are oftentimes the subject of admiration only for their sheer height or skyline silhouette and oftentimes criticized for their poor environmental performance and not without justification This book aims to change that impression by showing innovations that are particular to this group of tall buildings in addition to generally good architectural design and engineering prowess The CTBUH's Awards series draws from the multi disciplinary expertise of the practitioners directly involved in bringing these buildings to life This guide is intended for anyone working on the design and operation of tall buildings at both the building and urban scales
