The Big Push:

The Process of Economic Development James M. Cypher, James L. Dietz, 2004 This textbook includes discussions of such topics as the environment the debt case export led industrialization import substitution industrialization growth theory and technological capability

Westernizing the Third World Ozay Mehmet, 1999 The second edition of this successful and popular text has been updated and revised to include recent issues in development economics Significant new additions include Asian values and development democracy human rights and good governance globalization and development boxed summaries of key arguments and glossary Westernizing the Third World identifies the mainstream economic theories which have been employed in developing countries The author examines these and explains why Eurocentric concepts are not suitable for the developing world

Investing in Public Infrastructure Manoj Atolia, Bin Grace Li, Ricardo Marto, Mr. Giovanni Melina, 2017-05-04 Why do governments in developing economies invest in roads and not enough in schools In the presence of distortionary taxation and debt aversion the different pace at which roads and schools contribute to economic growth turns out to be central to this decision Specifically while costs are front loaded for both types of investment the growth benefits of schools accrue with a delay To put things in perspective with a big push even assuming a large 15 percent return differential in favor of schools the government would still limit the fraction of the investment scale up going to schools to about a half Besides debt aversion political myopia also turns out to be a crucial determinant of public investment composition A big push by accelerating growth outcomes mitigates myopia but at the expense of greater risks to fiscal and debt sustainability Tied concessional financing and grants can potentially mitigate the adverse effects of both debt aversion and political myopia

Anatomy of Development Bikram Pattanaik, 2025-03-20 This book details the fundamentals of development studies by adopting a multi disciplinary approach It presents a balanced mix of economic social political cultural and administrative premises of development and analyzes its theoretical and practical dimensions It also provides insight into the role of the stakeholders of development in different sectors The volume provides a holistic understanding of development effectively demonstrating how it differs from economic growth Beginning with development theories paradigms and actors involved in the development process this book goes on to explain the concepts of development administration development governance development planning development management and development communication One of the fundamental components of the book is the elucidation of Development Theories classical neoclassical developmental and heterodox theories essential to the discipline of development This book will be useful to undergraduate and postgraduate students researchers teachers of development studies economics sociology political science and public administration It will also be useful to administrators and development administration officials of state and central governments planners policymakers and people working in NGOs in addition to corporate sector functionaries dealing with corporate social responsibilities and those handling developmental issues and challenges

Eastern and Western Ideas for African Growth Kenichi Ohno, Izumi

Ohno,2013-05-29 The West and the East approach economic development differently The Europeans and Americans stress free and fair business climate promoting private activities generally without picking winners and improving governance East Asia is interested in achieving concrete results and projects rather than formal correctness prioritizing a few sectors for industrialization and eventual graduation from aid The West mostly shapes shifting strategies of the international donor community while the East has in reality made remarkable progress in industrial catch up The two approaches cannot be merged easily but they can be used in proper combination to realize growth and economic transformation This book proposes more dialogue and complementarity between the two in the development effort of Africa and other regions In this collected volume contributed by experts and practitioners from both East and West the need to introduce Eastern ideas to the global development strategy is emphasized Analysis of British and other Western donor policies is given while Japanese Korean and other Asian approaches are also explained with concrete examples The concept of governance for growth is presented and the impact of rising China on development studies is contemplated The practices of industrial policy dialogues and actions assisted by East Asian experts are reported from Tunisia Zambia Ethiopia Rwanda and others The book should be applicable to all donors institutions NGOs and business enterprises engaged in development cooperation

An Introduction to Place-Based Development Economics and Policy Gilberto Seravalli,2015-02-11 This book introduces the reader to local development economics and policy with a special focus on the place based paradigm that covers its justification its difficulties and the types of public intervention that it suggests The starting point for the analysis is that economic development in lagging places is not to be expected as the result of a mechanism of automatic convergence between backward and advanced regions and that therefore the most appropriate development policy is not to maximize competition among all agents in all sectors and places The failure of the Washington Consensus is examined and the two competing positions to have emerged from this failure spatially blind interventions and place based policies are contrasted The main shortcoming of spatially blind policies namely that immobile resources that could trigger or support a development process often remain untapped or trapped is emphasized The limitations of the big push state intervention and wage flexibility solutions to this trap are analyzed and the merits of place based policies that support intervention and can deal with uncertainty risk and conflict are discussed
